List of Figures

No.	Figure Name	Page
(2-1)	Total oil proved reserves between 1980 and 2009 (thousand million barrels)	6
(2-2)	Breakdown of world marketed energy consumption by fuel in 2007 and 2035	7
(2-3)	Basic schemes for biodiesel production	10
(2-4)	General cost breakdown for production of biodiesel	12
(2-5)	Equation of transesterification reaction	22
(2-6)	The process flow diagram for biodiesel production	24
(2-7)	Glass reactor with heating plate and magnetic stirrer	32
(2-8)	Biodiesel ester and glycerin layer	32
(2-9)	Biodiesel using NaOH catalysts	33
(2-10)	Biodiesel washing using distilled water	33
(2-11)	Producing the biodiesel fuel using waste vegetable oil from the school cafeteria.	34
(3-1)	A prototype of the reactor before modification	38
(3-2)	A prototype of the reactor after modification	39
(3-3)	Tank oil after modification	39
(3-4)	Reactor after installation of thermal insulator	40
(3-5)	Shaft of coupling and stirrer	41
(4-1)	Procedures of producing biodiesel from fresh vegetable oil	46
(4-2)	Mixing of Methanol and Catalyst	48
(4-3)	Process separating glycerol from biodiesel	49
(4-4)	Washing of biodiesel	50
(4-5)	Final product of soap	50
