Measurement of Serum Uric Acid, phosphate and Calcium Pre and Post Hemodialysis

A-General information:
1-Name: ..............................................................................................................
2-Age: ..................4-Residence......................................................
3-Gender: ......5-Occupation.................................................................

B-Clinical information:
1-Duration of disease ..................................................................................
2-exclusion Factors:
Cardiac disease .................................................................................
Gout...........................................................................................................
Hypertension...........................................................................................
Diabetes Mellitus....................................................................................
3-Type of Dialysis:
   Haemodialysis....................................................................................
   Peritoneal............................................................................................
4-Interval of dialysis per week: ............................................................

C-laboratory investigations:
Serum........................................................................................................
