Auditing the Traded Assets and Long Term Goods

Second: Auditing the goods last term:-

In order to ascertain what is contained in the statement of financial position, or institution should make sure of goods last term, this will be done through the actual stored inventory on the last financial period, because positive proof the existence of these goods is the vision and inventoried, this done through conceiting the number of each piece in the ground, or by the weight of those materials of the type that are weighed, measured, or through a process that evaluates whether those materials are made through measurement.

Here, the question arises: to what extend is the auditor responsible for the inventory of goods in the stores institution, and for the answer to this question has to be reviewing some of the views, as follows: not subjected to the law regulating the practice the profession of auditing in Jordan number (32) for the year 1985 for this.

On the other hand, the English law explain that not the auditor’s to do the actual inventory of goods remaining in the last period, and the auditor should adopt in the field work done by the facility or institution has the supposed confidence in them but in case he- any auditor- note potential source doubts.

The American law has explained that the auditor must be present while inventory is complete, and that the actual under his supervision and he take samples of the goods and check of compliance with the numbers taken up by the teams that the presence of the inventory is complete and that the actual under his supervision has to take samples of the goods and checking of
compliance with the numbers taken up by the teams that they process the inventory.

**Evaluating the good last term:**

The auditor must make sure that goods last term have been priced according to generally accepted accounting principles and have not been changed from year to year, and it the auditor noted that there is a change in these principles of the year again, it is his duty to draw the attention of project management for this change is to be avoided, otherwise, he said referring to the change in his report.

It is intended to show us the market price and the cost price, for a market price, there are several for interpreted, it is that it is a price to be paid any substitution in order to buy goods equal to replace the ones in the stores. Another view intended at the market price is the selling price of the goods excluding selling expenses pending full and discount commercial and other cost price.

The actual cost of the purchase price which is shown on the bill for that amount supplier invoice plus all expenses that were paid on the goods until these are ready for sale to the consumer of transport costs and customs duties and securing the goods.

**Thirdly Auditing Financial Investment:**

1/ **Auditing Machinery and Automotives:**

The auditor should follow these steps during the auditing process:
A- Perform matching between the balance of the budget contained machines with account balance in the general ledger and inventory sheets with the record of machinery that contains data on each machine, since the date of purchase until her life project.

B- Make sure the ownership of machinery for the project by reviewing purchase invoices and edit the name of the project and car licenses in the name of the project.

C- Make actual and ventory viewing to make sure there are machines.

D- Confirm assessing any machinery equal to the purchase price plus its other expenses relating to procurement and processing consumption by an accrual.

E- Make sure to address additions, repairs and maintenance of the machines during the financial period through inventory and record of machinery and preview.

F- In the case of mortgage on the machines, must make sure there in notein front of the budget item of machinery means that.

G- Make sure there is adequate insurance on the risks to machines.

2- Audit inventory:

At the end of the financial period of the project keeps Auditing Storage Goods inventory quantities were not used or sold and transported to the next year to be used or sold, often what be inventory in industrial projects of row materials and finished goods. When an auditor wants to check the elements inventory he must follow these steps:

a- Match the incoming data with budgetary accounting records.
• Audit calculation such as: Hit the main items contained lists and inventory and audit totals and migrated.

• Matching final statements of the inventory with the initial statements dressing then matching the figure with the statement in the budget.

• Matching detect inventory balances with different items in the stores ledger chosen by reference sample.

b- Make sure there is commodity stocks: this item is important to be on the auditor to do, because the inventory item represents an important part of the total assess owned by the project so house debate on the subject who is responsible for achievable, it is clear that it is not reasonable to be concerned auditor some items and neglects to achieve other items to show he is responsible for his opinion on the financial whole not only in a part of, although this a large responsibility and cannot carry out an inventory the auditor, however, must be expanded to reassure sampling to accuracy of the statement in the books and so is the budget that he had to perform his duty, here are the steps involved:

• Examination procedures and evaluate the inventory made by management and whether consistent with the due process followed by will in the past years.

• Auditor must ensure that the inventory method because there are two ways to inventory, the way first: closing stores at the end of the financial period a week, not to any input or output classes, and actually stripped items, here are lost opportunities to make profits. The second way: close all stores and the continuation of the project
activity in other sections, this method is flexible, but it is flowed in committing errors when adjustments.

- After confirming the validity of the inventory scans and matching inventory items contained therein cards with items, and that these acts fall within the scope of the project.
- Make comparisons between the books and records of stores daily purchase and sales, returns, and here the auditor lad done duty and he would receive a certificate from the administration to support his opinion.

c- Achieve ownership of inventory: purpose of the achievement the property is to ensure that all the statements of the inventory is owned by the project, regardless of where they are, whether in the project stores or in trust for others or by road, as well as to make sure that the goods are no statements in the inventory owned by a third party in possession of the project for any reason, such as escrow and mortgage. to achieve ownership of inventory followed by the following:

- Make sure the movement of input and outputs by making comparisons between records stores and diaries assistance to purchases, sales and returns, to make sure that all of what has been purchased or refund it has entered in to stores actually, and that any goods sold or given out of the stores, and this requires the review of invoices copie for sale and purchase and discount notices and matching these documents with document store such as permission receipt and disbursement.
- Get certificates from others who have their own goods owned by the project, such as: agents and stores leave.
• Make sure that exclusion of non–state-owned goods such as: consignment or sold by absurd bills but not delivered to the customer.

d- Accurate inventory: when assess in inventory items must take in to account the precautionary principle caution, evaluating product cost or market whichever is lower, because these elements had assets because not advanced higher prices it expected an unrealized profits, thus inflating the profits of the current year, if distributed, means capital and profits, always prefer to show the goods at cost in the trading account, in the case of the low markets price cost it dedicated to falling prices of materials and of the profit and loss account, the goal is to keep a calendar constant from year to year, however, the decline in the market price for the cost and in rare cases, accidental.

3- Debtors:

When debtors the auditor follows the following steps:

a- Perform matching between the balance of debtors contained budget with the balance of the total debtors book general ledger balances with total customer accounts in the book of assistant professor debtors, this require action documentary and calculation of these accounts, there for expanding the sampling and choose accounts that handle huge feature size, as being auditing examines the deportation of diaries help and balances the first term and the combination and the monitoring.

b- Achieving debt and achieve this by getting approvals from customers as previously reported, can be either positive approvals, negativity or blind, the monitor of approvals to a class of customers or to all clients, after they have printed models for these approvals and accompanied by an envelope and stamp it puts even not be a burden on the
client, and then the auditor have to make sure that customers who received what he called balances revealed in the fact that customers are customers, not the fake names were included in the books and by the inquiry ratifications, if there were no actual approvals auditor investigate the matter, even reassuring, has been assured by monitoring the collections during the next period, but confirms the existence of such a balance in the history of the end of the period following, and also must make sure that the components of the same balance and billing issues involved, which is still unpaid.

c- The achievement of the Accurate assessment of the debt: prove the existence of debt origination and commitment to hand the property and the ownership of the debt has already proven at achieving sales.

The evaluation of the achievement of this debt follows the following steps:

- The auditor examined the customers, accounts and billing compliance.
- Examination the regularity of payment for customers to determine the percentage of bad debts.
- Examination centers customers who are in arrears to determine the status of the client and identify bad debts, and verify the accuracy of processed.
- Make sure the auditor establishing a provision for doubt full debts and either be based on percentage of the total assets of the customers, based on census or inventory accounts and extract the Mick, in the event that the allocated more or less than the face of bad debt that it refers to the administration to amend the situation, and if the
administration insisted it must refer to the objection in the report conservatively.

- After all this auditor to obtain a certificate of project management stating the existence of the debt and the Accurate assessment to reinforce his position, however, this certificate for relieve him of responsibility, except if it has the performance of his duties and the reasonable standard.

4- Notes receivable:

5- It is of commercial paper, the project which handles and qualify these securities to maturity, or acting out, either sent to the bank or turning to it is creditors bonded on a project loan as collateral when you achieve auditor for notes receivable it follows these steps:

a- Perform matching notes receivable balance the budget contained with account balance notes receivable, then review this accounts with the daily papers from being arrested and deported and review of documentary and then called the total computational limitations in daily total public and migrated to two accounts and notes receivable total debtors.

b- Checking the stages through which such notes receivable conversion or debit the bank or payment before the date of maturity, or by emphasizing the promised or rejection and renovated, and algoidprotestorand, the benefits of the delay.

c- Make sure there are notes receivable inventory through bills of exchange and promissory notes, and they are correct legally, being inventoried at the inventory of cash, then matches the result of the inventory with the balance notebook with daily notes receivable,
taking into account all the data mandatory in the bill and in the case of a bank bills I have, for the auditor to obtain a certificate from the bank describes the purpose of preservation. in the case of notes receivable, but the project remains guarantor, no official until repaid.

d- When assessing the commercial paper to follow auditor repay commercial paper in the following periods to ensure accurate of the balance of the last year, and examines all the papers that did not deserve the end of the fiscal years, whether I have a project or in any other, based on this foundation determines the amounts of provision for doubtful debts and to be configured, and make sure that the administration made it, in the case of deposits with the projects as collateral to repay commercial paper on the auditor that sends approvals for customers to prove this guarantee and kind.

5- Audit rights holders of the project:

And the rights of the owners of the project include: capital owned reserves, retained earnings, allowances, and when you achieve capital auditor does the following steps:

A-in the case of individual projects:

- Auditor capital stock in the first period within the balance of the previous budget contained, with are view of the incident, additions during the current year documentary, and checks the value of the capital and to make sure the estimated value.
• Auditor investigation to increase capital through profits and losses with the scrutiny from the reduction of personal with drawls by reviewing drawings with supporting documents.

b-in the case of individual companies:

• Knowledge of partners, shares through access to the company’s contract and make sure the repayment terms and interest rate and capital
• Recognize the special conditions by withdrawals and interest accrued there on, and the term of the distribution of profits and losses.

c-In the case of joint stock companies:

You must make sure the auditor of the following things:

• Rules printed stock certificates and the presence of serial numbers and save them in a safe place and determine responsibility
• There is no record of the shareholders with allocation page for each shareholder.
• A system for recording the concessions after approval of the board of directors.
• Make a match between the balances of the issued share capital account in the general ledger balances with the total set a record of shareholders.
• The need to obtain delivery of shares delivered to the share holders
• Audit subscriptions with records under writing and customization
• Audit the board’s decisions for the allocation of subscription shares with record and customization and with the register shareholders.
• Audit heels certificates issued shares with the shareholders register matching capital stock with total balances of individual pages for shareholders in the shareholders register.

• If there were no funds for new shares during the year he was content with the auditor to review balance of the first period with what was stated the previous budget.

• If there are lots of references in kind must be found on the restrictions that have liberalized between the general assembly.

• In the case of a capital increase should make sure that it is not permissible to increase only after the payment of all the original capital.
Audit obligation and short and long term property rights:

When you achieve as result of the industrial project through the list as a result of the business, they come in successive phases, in the first stage is called the operating account and show the cost of production of finished units, and the second phase and claims trading account and appear as a result of acts of commercial activity, and the overall profit and loss account, and the means to clarify this point as a result of net business profit or loss.

The following explanation of how to audit the elements of the business result for the financial period ended:

First: Suppliers

To audit the account of payments to suppliers of materials must follow the following:

- Ensure that all supporting documents for the supply of materials supplied from the purchase invoice in addition to all the documents.
- Ensure that all documents stamped and signed by the party that has supplied materials.

b- Auditing in daily aggregates sales and deported total from another page.

c- Auditing deportations own by returns of daily sales returns to personal accounts.

d- Audit calculation own by returns sales total at the end of each period to make a total restrictions and deportations to audit my sales returns and total debtors’ ledger.
**Auditing property right and provisioning and other payables:**

**Preamble:**

Representing the rights of the owners of the project or the net assets of the enterprise business, in other words, the different between total assets and liabilities facility available to third parties, they can be summarized as follows:

A- Capital: the capital varies depending on the quality of the facility being established in individual fairs money here represent pay owner of the facility in order to fund his work. as for individual companies is represented in the capital, including the pay of these people in the capital. the companies in the funds is to shares of equal value to gather constitute.

B- Precaution: it is the amount that will be deducted from the profit of the project in order to meet a specific goal or goods. Here, we must distinguish between the reserve and allotted, reserve comes from the net profit of the institution or the project, while the custom comes from the revenue made during the financial period, in other words, that precautions be rights for the shareholders, while the provisions are considered current liabilities on the institution.

C- Retained earnings: they represent the remaining amounts of the rest of the items and the duty show in the calculation of the distribution of profits and losses by the spare compulsory and optional, the income tax and bonuses and soon.
First: audit procedures capital:

1- the individual in project:
   a- Verify the validity of the capital at the beginning of the financial period and that by returning to the previous financial period.
   b- Check on the new additions made during the period of the current financial and audit documents that supports the additions, and that those additions, and that those additions were recorded in the appropriate records.
   c- Examination and cuts may be made during the financial period as a result of personal withdrawals’ and make sure of it.
   d- Scrutinizes calculate profits and the losses and confirm those profits or losses.

2-The People in companies:
   a- Found on the company’s contract and the amendments there to, and specifically with regard to partners, and then examine the documents for registration of the company with the component authorities.
   b- Identify the stakes withdrawals partners and do not exceed those as scheduled in the articles of incorporation.
   c- Screening method of distribution of profits to partners as to what is contained in the articles of incorporation.
   d- Make sure that the company applied stated in the companies act, in term of increase and the reduction of capital.
3- in joint stock companies:

a- Found on the company and the rules of procedure of the company as well as the resolution of the general authority and to identify the nominal capital and un authorized, and the type of stocks in the capital and the rights of those shares by species.
b- Identify what has come to capital increase to minutes of meetings of the general authority for shareholders.
c- Audit premiums un paid in timely manner and to ensure that legal proceedings have been taken in this regard.
d- Ensure that the company’s shares traded in the capital market was in accordance with the legal requirements for the corporate law and the rules of the stock market.
e- Confirm capital in the lists of the financial position in terms of authorized capital and issued capital and paid – up.

Second: Reserves:

Reserves are the amount that the project booked profits to support its financial position or for specific purposes, are either optional or mandatory, and after the determination of net profit.

When you achieve auditor reserves upon audit balances first period with what was stated in the previous budget and follow the decision of the general assembly regarding the adoption of the distributions within the rules set forth. Here are some of the actions that the auditor should take into account:
1- **Statutory reserve**:  
   a- Make sure to book legal reserve decision, which is differ in different countries and laws in force. In Jordan, for example, booking by 10% of the net profits until such time as the reserve was less than the upper limit on the auditor to make sure that there decision of the board of directors of the company.  
   b- In the event of an increase or decrease of auditor to make sure that the company has dealt with those changes by law and internal regulation of the company.  
   c- At the insistence of new shares at a premium insistence on the auditor to make sure that the premium that has been added to the statutory reserve.  
   d- In case of the use of this reserve or part of the auditor to make sure of this reserve may be used in accordance with the laws and regulation.  
   e- Make sure that the company has restored what has been taken from this reserve in the previous year.  

2- **Optional Reserve**:  
   a- To ensure that the voluntary reserve ratio does not exceed a legal varies each country and it’s laws in force in Jordan, 20% annually. And not exceed the total of those precautions prescribed percentage 50% except banks and insurance companies, which hold higher limit less.  
   b- Make sure voluntary reserves and uses it within the laws and regulations in force.
Thirdly: operating account:

He is the first account of the final accounts opens in industrial project in order to limit the total cost of production during the period. The following elements of this account with the duties of the auditor for each element:

1- The goods of cost under operating in the first term:

This is about the cost of units that have not been produced by the end of the previous period and left its total to the current period, which represents one of the elements of the financial position of the project in the previous period, the auditor must be reviewed financial statements from the previous year to match the balance of these goods with what was stated in the budget and only it is not being inventory because it underwent monitoring the previous year.

2- The Direct Costs of Elements of Direct Costs, Consisting of:

a- Direct materials: the materials that go into the formation of the period and keep him until his extinction, its can easily customize the product units and to bear the cost of these materials at the expense of operating after the settlement of purchases of these materials at accost of inventory in the first and last time.

Audit procedures:

The auditor confirms settlement procedure for the inventory stock of materials first and last time, either procurement procedure or screening has been achieved in prior periods.
b- Direct wages: the cost of the work, which was used directly in the production units, which ended which can be customized easily to complete the units and assume this cost at the expense of operating.

Audit procedures:

The auditor verify the validity of the analysis of wages to pay directly and indirectly, and load the operating account of direct only, data for wages and salaries have already been audited by the references in the past.

c- Industrial direct costs: the costs of other industrial and easily as possible to increase the production units, such as the costs of the designs.

Audit procedures:

It is sure to be allocated at the expense of Accurate of running because they represent part of the direct costs.

3- Industrial indirect costs:

These costs consist of expenses that cannot be easily customized as well as the manager of the factory, such as salary and lubricants.

4- Cost of goods under another operating duration:

The cost of products, which commenced its production during the current period have not been produced during the same period, these goods are items from the financial period, the account appears operating creditorside.
Fourth: trading account:

It is the second stage of the list business results, and it costs on interview occur revenue expenditure for the financial period After making inventory adjustments for the goods in full first and last term and appears in the result of this calculation the total profit or loss for the period.

Audit procedures:

The auditor must be sure to match the incoming data and calculates the trade data contained books.

Fifth: The profit and loss accounts:

A third and final phase of the stages of a list of business results, and includes both a result of trading profit or loss, in addition, at this stage as well as profit offs and non profits as ordinary gain on sale of fixed assets.

Then load this account expenses related to the financial period which had not previously loaded on an earlier stage of the stages of the list as a result of the business.

Regarding the marketing costs if they carried a trading account or for the profit and loss account, that will not ultimately affect the net result of the business profit or loss.

And the role of auditor is to match the data contained profit and loss account and the data were reviewed in the books before and confirm processing inventory adjustments.
