

## Abstract

The problem of this study lies in addressing the problem of how to achieve effectiveness of competences because, due to its importance in bridging the gap between technical education outputs –on the one hand – and meet the requirements of the labor market –on the other hand –the

: problem was drafted in the following question

What is level of effectiveness of the technical adequacy of education ?output, in meeting the requirements of the labor market in Yemen

The researcher branched this question into several questions depending :on the following hypothesis

The first: clear objectives for technical education in Yemen, clear and respond to the requirements of the labor market from the perspective of .labor owners in the public and private sectors

The second: the promotion of technical education output in Yemen to meet the requirements of the labor market, which are now considered modest from the stand point of the labor owners in the public and private .sectors

The third: the private sector contributes to developing technical education in an average level from the standpoint of labor owners in the public and .private sector

The fourth: fit technical institutes outputs, are competent with labor market needs in an average level from the standpoint of the labor owners .in the public and private sectors

:-The researcher adopted the following two methodologies

.The descriptive survey and analytical methodologies

Also were collected data and information via the questionnaire, and have .(been processed using a statistical program(SPSS

:The research reached to the following findings

the level of a appropriate technical institutes outputs , to the need .1  
of labor market are medium from the perspective of businessmen  
in the public and private sectors , this standard came in the first  
(place , as in the arithmetic average(2.14

Level of success of the technical education outputs in meeting the .2  
requirements of the labor market is considered modest from the  
standpoint of labor owners in the public and private sectors where  
(the mean was second with(2.4

The effectiveness of the technical adequacy of the education .3  
output meet the requirements of the labor market in general, has  
(reached arithmetic average of the third place (2.01

There are clear objectives for technical education in Yemen, which respond to the requirements of the labor market from perspective of the labor owners in the public and private sectors where this (standard got the fourth place by (1.94

The researcher at the summary of this study provided several recommendations, including

- 1) researcher recommends providing a website that contains all the data and statistics needed for the outputs of technical education and through various media, governmental or private to make the sector able to cover its needs
- 2) To update the contents of education and training curricula and to link it to the labor market
- 3) To conduct studies, research and work on the analysis of result and challenges facing difficulties of technical education and the labor market
- 4) To take advantage of the successful experiences of global technical education output to meet the labor market
