آيات قرآنية

1
يَسْمَعُ اللَّهُ الرَّحْمَنُ الرَّحِيمُ
اَفْرَا ُرَبِّكَ الَّذِي خَلَقَ (1) خَلَقَ الْإِنسَانَ مِنْ 
عَلَقٍ (2) اَفْرَا وَرَبِّكَ الْأَكْرَمُ (3) الَّذِي عَلَمَ ُبَالْقَلَمِ (4) 
( عَلَمَ الْإِنسَانَ مَا لَمْ يَعْلَمْ (5) صُدِقُ اللَّهِ العَظِيمِ
الآيات من (1-5) من سورة العلق
This thesis is dedicated to my parents, my family, and especially my uncle Abdalraziq Altayib who have supported me all the way since the beginning of my life.

Also, this thesis is dedicated to all those who has been a great source of motivation and inspiration.
Finally, this thesis is dedicated to all those who believe in the richness of learning.
ACKNOWLEDGEMENT
First and foremost I would like to thank my supervisor, Dr. Yasser Saber, for his continuous assistance and feedback during the past few months. I am indebted to Dr. Yasser as he initially proposed this project when I had a tiny about what I wanted to work on, beyond “something about benchmarking techniques”.

XII
I am also grateful to Open University of Sudan (OUS) staff for their crucial help and support, especially OUS developers for their timely answers about OUS OLTP. In particular I would like to thank Ustaz Salah Altigani Alhilo who is essentially a precise auditor to endure many of my early thesis drafts.
Finally, I would like to thank my family who has supported me during the course of this dissertation. Without their assistance this work would not have been possible. Above all thanks GOD enabling me to finish and submit this work.

Abstract  2
Chapter One  3

Part One: Introduction ................................................................. 4
  1.1.1 Introduction ................................................................. 5
  1.1.2 Problem Statement .......................................................... 25

XVIII
Part Two: Implementation

2.2.1 Introduction ................................................................. 38
2.2.2 Network Storage Server (Openfiler) ................................. 39
2.2.3 Cluster Instances Environment (RAC) .............................. 44
2.2.4 Single Instance Environment (SI) ..................................... 75
2.2.5 Miscellaneous Setup ...................................................... 76

XXI
4.1 Introduction ................................................................. 86
4.2 DB file Sequential Read ................................................ 87
4.3 Latches: ges resource Hash List ...................................... 88
4.4 Reversing the Indexes Key .............................................. 90
4.5 Memory Target ............................................................. 92
  4.5.1 Enable MEMORY_TARGET .......................................... 94
