Assessment of Plasma Levels of total Cholesterol and LDL-Cholesterol in Relation to glycemic Control in Sudanese Patients with type 2-Dibetus Mellitus

Questionnaire

A-General information

1-Name..........................  2-Age......years
3-Gendar (i) male (   ) (ii) female (   )  4-Occupation......................

B-Clinical information

1-Duration of disease..........years

2-Present history of disease:

Gout.................

Hypertension..........  
Renal disease..........  
Thyroid disease..........  
Familial Hyperlipdaemia..............  
Coronary Heart disease..............

3-Treatment: Hypoglycemic Agent (   ) Diet (   ) None (   )

C-Biochemical Measurement:

1-Total Cholesterol...............mg /dl
2-LDL-cholesterol...............mg /dl
3-Glyucose.........................mg /dl
