

الآية

بسم الله الرحمن الرحيم

قال تعالى: ((فَتَعَلَى اللَّهِ الْمَلِكُ الْحَقُّ وَلَا تَعْجَلْ بِرِ الْقُرْآنِ مِنْ قَبْلِ
أَنْ يُقْضَى إِلَيْكَ وَحْيُهُ وَقُلْ رَبِّ زِدْنِي عِلْمًا))

صدق الله العظيم

DEDICATION

**To our parents, and anyone who lived his whole life
as an unknown engineer.**

Acknowledgement

First of all, I would like to express our gratitude and sincere thanks to our respected Faculty Assistant's GALAL ABDU ALRAHMAN MOHAMMED for his professional guidance, advice, motivation , endurance and encouragements during his supervision period. The present work would have never been possible without his vital supports and valuable assistance. Then I would like to thank all my friends whose tips and views were useful indeed and then thanks to the other faculty members and staff of the school of Electrical and Nuclear Engineering for their extreme help throughout our courses of study.

ABSTRACT

The project is designed to control AC power to the load by using firing angle control of thyristor. Efficiency of such power control is very high compared to any other method.

The project uses zero crossing point of the waveform which is detected by a comparator whose output is then fed to the microcontroller.

The microcontroller provides required delayed triggering control to a pair of SCRs through opto isolator interface. Finally the power is applied to the load through SCRs in series. This project uses a microcontroller pic 16f73 which is interfaced through a push button switch for increasing or decreasing the AC power to the load.

المستخلص

يهدف هذا المشروع الى التحكم على التيار المتردد عن طريق زاوية اشعال الثايرستور حيث تعتبر هذه الطريقة من أكثر طرق التحكم كفاءة مقارنة مع الطرق الأخرى. يتم تنفيذ المشروع عبر تغذية المتحكم الدقيق الذي يوفر الاشعال لزوج من الثايروستر من خلال عوازل الخرج حيث يتم تغذية الحمل عن طريق الثايرستور بالتوالي. استخدم متحكم دقيق من النوع (pic 16f73) الذي يتم ربطه بمفاتيح تحكم لزيادة او تقليل تيار الحمل.

LIST OF SYMBOLES	x
LIST OF ABBREVIATION	xi
CHAPTER ONE INTRODUCTION	
1.1 Background	1
1.2 Problem Statement	1
1.3 Objectives	1
1.4 Methodology	2
1.5 Layout	2
CHAPTER TWO GENERAL CONCEPTS	
2.1 Introduction	3
2.2 Electric Motors	3
2.2.1 Operation	4
2.2.2 Types of motor	4
2.2.3 Induction Motor	4
2.3.1 Construction	5
2.3.2 Principle operation of 3-Phase induction motor	8
2.3.3 Equivalent Circuit	9
2.3.4 Slip	11

2.4 Control	12
2.4.1 Starting and speed control methods	15
2.5 Thyristors	16
2.5.1 Basic structure and operation	16
2.5.2 Static characteristics	17
2.5.3 Dynamic switching characteristics	19
2.6 Microcontroller	19
CHAPTER THREE DESIGN OF CIRCUIT	
3.1 Introduction	24
3.2 Microcontroller (16F73)	25
3.3 Regulated Power Supply	27
3.4 Crystal Oscillator	28
3.5 Reset Button	30
3.6 Light Emitting Diode(LED) Indicator	30
3.7 Zero Crossing Detector	32
3.8 TRIAC	34
CHAPTER FOUR IMPLEMENTATION OF CIRCUIT	
4.1 Introduction	40
4.2 Simulation Matlab	40
4.3 Software Program microcontroller	43
4.4 Operation	44
CHAPTER FIVE CONCLUSION AND RECOMMENDATIONS	
5.1 Conclusion	45
5.2 Recommendations	45

LIST OF SYMBOLS

N_s	Synchronous speed
F	Frequency
P	Number of poles
R_s	Stator resistance
R_r	Rotor resistance
L_{sl}	Stator inductance
L_{rl}	Rotor inductance
L_m	Magnetic inductance
R_m	Copper losses resistance
I_m	Magnetic part current
V_s	Voltage source
I_s	Input current
P_g	Air gap power
P_{CU_s}	Stator copper losses
P_{iron}	Core loss
P_{lr}	Rotor copper losses
V_m	Magnetic part voltage
P_o	Output power
P_{in}	Input power
T_e	Development torque
ω_m	Rotor angular speed
S	Slip
ω_e	Synchronous angular speed
Ψ_m	Air gap flux
ω_{sl}	Synchronous angular speed
N_r	Rotor speed

LIST OF ABBREVIATION

AC	Alternating Current
DC	Direct Current
V	Volt
I	Ampere
HZ	Hertz
LED	Light Emitting Diode
ZCD	Zero Crossing Diode
PMDC	Permanent Magnet Direct Current
SCR	Silicon Controlled Rectifier
GTO	Gate Turn-Off thyristor
