Sudan University of Science & Technology
College of Graduate Studies and Scientific Research
Assessment of the plasma levels of Urate and Magnesium in Sudanese Patients with Type 1 diabetes

A thesis Submitted in Partial Fulfillment for MSc. Degree in Clinical Chemistry

By:
Samira Adam Abdalla
Elzaem Elazhary University (clinical chemistry)
Higher diploma Elzaem Elazahary University, (2006)

Supervisor:
Dr. Bader Eldien Hassan Elabid
MB BS (U, of K), MD clinical pathology (clinical chemistry)
Associate Professor of clinical pathology
University of Science & Technology

July, 2011
بسم الله الرحمن الرحيم

قال تعالى:

فَلَوْ كَانَ الْبَحْرُ مَدَادًا لِكَلِمَاتِ رَبِّي لَنَقُدَ
الْبَحْرُ قَبْلَ أَنْ نَقُدَ كَلِمَاتُ رَبِّي وَلَوْ جَنُّا بَيْنَهُ
مَدَدًا

سورة الكهف آلية 109

صدق الله العظيم
Chapter one

1. Introduction

1. Introduction

1.1. Rationale
2. Literature Review

2.1. Diabetes mellitus

2.1.1. Classification of diabetes mellitus

2.1.2. Primary diabetes mellitus

2.1.3. Laboratory diagnosis of diabetes mellitus

2.1.4. Complication of diabetes mellitus

2.2. Uric acid

2.2.1. Source of uric acid

2.2.2. Metabolism of uric acid

2.2.3. Plasma urate

2.2.4. Disorders of plasma urate

2.3. Magnesium
Chapter Three

3. Materials and methods

3.1. Study design, area and period
16

3.2. Target population and sample size
16

3.3. Inclusion criteria and exclusion criteria
16

3.4. Ethical consideration
16

3.5. Data collection and clinical assessment
16

3.6. Methodology
17

3.6.1. Instrument
17

3.6.2. Measurement of plasma urate
17

3.6.3. Estimation of plasma magnesium
18

3.7. Quality control
19
Chapter Four

4. Results

4. Results

Chapter Five

5. Discussion

5. Discussion

Chapter six

6. Conclusion and recommendations

6.1. Conclusion

6.2. Recommendations

References
