	Abstract in English	V
	(Abstract in( Arabic	V
<b>Chapter One: Introduction and basic concepts</b>		
1.1	Introduction	1
1.2	The importance of the Study	3
1.3	The aim of the study	3
1.4	Procedures of the study	3
1.5	Sample study	4
1.6	Thesis out line	4
1.7	Basic concepts	5
7.1 .1	The nature of light	5
7.2 .1	The wave nature of light	6
7.3 .1	The particle nature of	8
7.4 .1	Regions of the electromagnetic spectrum	10
7.5 .1	The power of light	10
7.6 .1	Transparent and opaque matters	11
1.7.7	Homogeneity and Heterogeneity	12
1.7.8	Organic Materials	12
1.7.9	Interaction of Light with matter	13
7.10 .1	microwave interactions	14
7.11 .1	Infrared interaction	15
7.12 .1	Visible light interactions	16
7.13 .1	Ultraviolet interactions	17
7.14 .1	X-ray interactions	18
7.15 .1	Absorption	19
7.16 .1	Emittance	22
7.17 .1	Emission Spectra	22
7.18 .1	The relation between transmittance, reflectance,absorbance	23
1.7.19	Reflection and refraction: Snell's law	24
7.20 .1	Critical angle	27
7.21 .1	Dispersion	28
7.22 .1	Scattering	28
7.23 .1	Bragg's law	30

<b>Chapter two</b>		
2.1	The history of thin films	33
2.2	The production of thin film	34
2.3	Thin film deposition techniques	34
2.3.1	Physical vapour deposition	34
2.3.2	evaporation	34
2.3.4	Thermal evaporation	35
2.3.5	Electron-beam evaporation	36
2.3.6	Laser deposition of thin films	37
2.3.7	Chemical vapour deposition	39
2.3.8	Sputtering	40
2.3.9	Coating	41
2.3.10	Spin coating	41
2.4	Antireflection	41
2.5	Transmission and reflection of coating on substrate	42
<b>Chapter three</b>		
3.1	Optical thin –film materials	44
3.2	Thin semiconducting films	44
3.3	Film thickness	45
3.4	Optical properties of thin films	45
3.5	Mechanical properties of thin films	46
3.6	Characterization of thin films	46
3.7	Some applications of thin films	47
3.8	Optical filter	47
3.9	Emission of light	48
3.9.1	Luminescence properties	48
3.9.4	Band gap luminescence	53
3.9.5	Properties of semiconductors	56
3.9.7	Intrinsic and extrinsic semiconductors	60
<b>Chapter Four: Experimental work</b>		
4.1	Introduction	62
4.2	Apparatus and experiment procedures	62
4.3	Structural measurements	68
4.4	Sample preparation	69
4.5	The methods of MnS thin films deposition	69
4.6	Methods of thickness measurement	70
4.7	Transmission and reflection measurement	71

<b>Chapter Five: Results and discussions</b>		
5.1	Introduction	72
5.2	Result and analysis	72
5.3	Discussion	76
5.4	Calculation analysis of thickness	83
5.5	Conclusion	86
5.6	Future work	87
	<b>References</b>	88

## Appendix

No	List of figures	Page
1	.Figure 1.1 the Electromagnetic spectrum	9
2	Figure 1.2 the interaction of radiation with matter	14
3	Figure 1.3 Microwaves interactions	15
4	.Figure 1.4: Infrared interaction	16
5	.Figure 1.5 Visible interactions	17
6	.Figure 1.6: Ultraviolet interactions	18
7	.Figure 1.7 X-ray interactions	19
8	Figure 1.8: Linear absorption of light in a sample of .thickness	20
9	Figure 1.9: Schematic diagram as illustration absorption coefficient of light	21
10	.Figure 1.10 Reflection and refraction	24
11	Figure 1.12 definition of critical angle.	27
12	Figure 1.13 Schematic diagram as illustration to derive Bragg's Law	31
13	Figure 2.1 Simplified atomic energy level diagram showing excited states of atomic He-Ne that are relevant to the .operation of the He-Ne laser at 632nm	38
14	.Figure 2.2 Magnetron sputtering process	40
15	.Figure 2.3 scheme of multilayer reflection	44
16	.Figure 3.2 Excitation to emission	51
17	..Figure 3.3 Schematic diagram of how atoms emit light	55
18	Figure 3.5 schematic energy band a conductor with possibilities partially filled conduction band and shown a semiconductor and insulator.	58
19	Figure 4.1 Schematic view of Michelson interferometer	63
20	Figure 4.2 thermal evaporation deposition system (Coating units).	65
21	Figure 4.3 Schematic view of Michelson interferometer	66
22	Figure 4.4 UV Vis Spectrophotometer optical designs	68
23	Figures 4.6 sample of (MnS) substrate on glass	70
