English Abstract | IV
Arabic Abstract | VI

### Chapter One: Introduction and Objectives

1.1 Introduction | 1
1.2 Rationale | 3
3. Objectives | 4

### Chapter Two: Literature Review

2.1 Historical background | 5
2.2. The genus *Mycobacterium* | 6
2.2.1. Taxonomy | 6
2.2.2. Classification | 6
2.2.3 Morphology and structure | 7
2.3 *Mycobacterium tuberculosis* complex | 8
2.3.1 The Cell wall | 8
2.3.2. General characters | 9
2.3.2.1. Nutritional and environmental requirements for growth | 9
2.3.3.2. Resistance to physical and chemical challenges | 10
2.3.4. Natural habitat | 11
2.3.5 Tuberculosis | 11
2.3.5.1. Pathogenesis | 11
2.3.5.1.1. Virulence Mechanisms | 11
2.3.5.2. Tuberculosis (the disease) | 11
2.3.5.2.1 Primary Tuberculosis | 12
2.3.5.2.2 Secondary Reactivation Tuberculosis | 12
2.3.5.3 Reservoirs and Mode of Transmission | 13
2.3.5.4 Pathogenicity of Mycobacteria | 13
2.3.5.5 Clinical features | 13
2.3.5.5.1 Pulmonary Disease | 13
2.3.5.5.2 Tuberculosis Meningitis | 14
2.3.5.5.3 Lymph Node Tuberculosis | 14
2.3.5.5.4 Bone and Joint Tuberculosis | 14
2.3.5.5.5 Gastrointestinal Disease | 15
2.3.5.5.6 Cutaneous Tuberculosis | 15
2.3.5.5.7 Renal tuberculosis | 16
2.3.5.6 Epidemiology
2.3.5.7 Laboratory diagnosis
2.3.5.7.1 Conventional Methods for Identifying MTB
1.3.5.7.1.1 Microscopic Techniques
2.3.5.7.1.2 Traditional Culture Techniques
2.3.5.7.1.3. Biochemical Tests and Morphological Features

Features
2.3.5.7.2. Molecular Methods for Identifying MTB
2.3.5.7.3. Susceptibility Tests for MTB
2.3.5.8 Treatment
2.3.5.9 Multidrug resistant mycobacterium tuberculosis
2.3.5.9.1 Epidemiology of Multidrug-Resistant TB
2.3.5.10. Molecular Basis Of Drug Resistance
2.3.5.10.1. Rifampicin and other rifamycins
2.3.5.10.2 Isoniazid (INH)
2.3.5.11 Management of Drug-Resistant Tuberculosis

Chapter Three: Materials and methods
3.1 Study Design
3.2 Asepsis and sterilization
3.3 Sample collection
3.4 Ziehl -Neelsen stain
3.5 Decontamination of Sputum
3.6 Preparation of Lowenstein Jensen medium
3.7 Culture Method
3.8 Identification of the isolates
3.9. Biochemical Tests
3.10. Drug Susceptibility Testing
3.11. Molecular Identification (PCR)

Chapter Four: Results
4. Results

Chapter Five: Discussion
5. Discussion

Chapter Six: Conclusion & Recommendations
6.1 Conclusions
6.2 Recommendations
References
Appendices
List of figures

Fig.1. Showing acid fast bacilli using ZN stain 36

Fig.2 characteristic growth of *M. tuberculosis* on LJ medium 37

Fig.3 Showing results of Catalase test 39

Fig.4 Showing results of nitrate reduction test 40

Fig.5 The amplicon of MTC after first run of PCR 42

Fig.6 The amplicon of MTC after first run of PCR 43

Fig.7 The amplicon of Rifampicin 45

Fig.8 The amplicon of Rifampicin 46

Fig.9 The amplicon of Isoniazid of PCR 47
List of Tables

Table 1. Growth Rate 35
Table 2. Biochemical Tests 38
Table 3. susceptibility by LJ proportion method 44
Table 4. Drugs susceptibility by PCR 41
