Dedication

I am glad to dedicate this work, to my grand family and as a special wise to my parents ,to my sincere wife , to my darling young daughter(Arwah),to whom all participate in my learning operation.

Acknowledgements

First of all I would like to express my gratitude to Allah for his endowment offered to me to complete this work .
secondly, I would like to advance with a high verses of a thank to Dr. Mubarak Dirar not only for his kind guideness and valuable advices , but also for the good manner , in addition to friendly behavior that I feel.
Really, I feel especially, indebted to him , Dr. Dirar, to his powerful role that he played in this work , until have become fact .
It is with a sense of deepest gratitude that I acknowledge the assistance which has been afforded me so kindly by numerous friends and many persons have contributed either directly or indirectly to this thesis .
Finaly , I am glad to extend thank to my family department of physics, who are embolden me to complete this research .and my thanks extend to Ustaz Hala Gaafer and Ustaz Rasha M.A wad.

Abstract

In this work the generalized Euler-Lagrangian is utilized to find Maxwell's equations. It is found that Maxwell's equations can be derived from a new Lagrangian which is different from that of the ordinary Euler-Lagrangian. It is also found that the Hamiltonian of this new Lagrangian is different from that of the ordinary one.

في هذا البحث استخدمت معادلة اويلر- لاجرانج لاشتقاق معادلات ماكسويل. وجد أن امكانية اشتقاق معادلات ماكسويل من دالة لاجرانج الجديدة, والتي تختلف عن تلك التابعة لاويلر- لاجرانج المألوفة. كما وجد ان دالة هاملتون لدالة لاجرانج الجديدة تختلف عن تلك المألوفة.

Chapter One
Introduction

1.1 Prelude……1
1.2 Presentation of The Thesis…..……....2

Chapter Two
Maxwell's Equations

2.1 Introduction…….……..3
2.2 Electric and Magnetic Field Intensity……..…….……3
2.3 Electromotive Force……..4
2.4 Magnetic Field Flux Across a Surface…….4
2.5 Faraday's Induction Law……..……....5
2.6 Maxwell's Equation ……..……..6
2.7 Electromagnetic Potentials……..……9
2.8 Magnetomotive Force…….……..10

Chapter Three
Eule-Lagrange Equation

3.1 Introduction……12
3.2 Frames of Reference……...……12
3.3 Specification of Time……...……..13
3.4 Degree of Freedom…….13
3.5 Generalized Coordinates…… . .13
3.6 Lagrange's Equation……..14
3.7 Action Principle……14
3.8 The Calculus of Variation…….……15
3.9 Principle of Least Action…….……16
3.10The generalized Euler-Lagrange Equation……...18

Chapter Four
Lagrangian Formalism of Maxwell's equations

4.1 Introduction…….21
4.2 Lagrangian Formalism of Maxwell's Equations…….……21

Chapter Five
Maxwell's Equation from Generalized Euler-Lagrange Equations

5.1 Introduction……...29
5.2 The Generalized Lagrangian……..29
5.3 Maxwell's Equations……..30
5.4 The Generalized Hamiltonian……32
Discussion and Conclusion……33 5.5

References…….34
