

# **DEDICATION**

*I dedicate this work to ...*

*My parents...*

*My family...*

*My teachers...*

*And to those whom I love*

# **ACKNOWLEDGEMENT**

*Praise to Allah who gave me health and patience to accomplish this work.*

*My deepest gratitude goes to **Dr. Elfatih Ahmed Hassan** my supervisor, for suggesting this work, for his encouragement and supervision over the course of this study, for his keenness to follow this project, theoretically and*

*practically, and for his friendly guidance throughout this work.*

*My gratitude goes also to **Prof. Nafie Abd Al-Lattif** the supervisor, for his advice, encouragement, continuing commitment, dedication and support, and for willingly being available to provide help when needed.*

*I would like to thank Sudan University of Science and Technology for its financial support.*

*I would like also to thanks Dr. **Abdulmonem Artoli** at Elneelain University-Department of physics, and the visiting engineer **Twan** at Elneelain University–Department of Physics, electronic workshop for their help in designing and assembling the sample chamber used in this work.*

*Finally, I would like to extend my thanks to the staff of chemistry and physics department, at Sudan University of Science and Technology and laser institute staff for their continuing help and support.*

***Without all those people, this work could not have been done.***
