

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قال الله تعالى

قَالَ رَبِّ أَوْرِعْنِي أَنْ أَشْكُرَ نِعْمَتَكَ الَّتِي أَنْعَمْتَ عَلَيَّ وَعَلَى وَالِدَيَّ وَأَنْ أَعْمَلَ صَالِحًا تَرْضَاهُ وَأَصْلِحْ لِي فِي ذُرِّيَّتِي إِنِّي تُبْتُ إِلَيْكَ وَإِنِّي مِنَ الْمُسْلِمِينَ

صدق الله العظيم

سورة الأحقاف الآية 15

DEDICATION

To the candle which burns to light my life
My Mother

To the one who live for making his dreams become true

My Father

To those who have made it possible

My Teachers

To those who encourage me and are always around me MY Friends

ACKNOWLEDGMENT

Thanks first and last for Allah who enabled me to conduct this study by his grace and provided me with strength and patience to complete my project.

For all those who have supported me, and helped me in this research, I send my thanks and deepest gratitude.

Special and deepest regard for my supervisor Dr. Mubarak Saeed Alkarsany for his help and close supervision.

To my friends who supported me specially Waleed Dafallha, Muaz Kamal, Mohammed babiker, Aza Abdalraheem.

My gratitude is also extended to the staff hematology and Immunohematology department for their help throughout the study.

ABSTRACT

This is descriptive cross sectional study which was carried out in Khartoum state, in period from March 2013 to August 2013 to assess the effects of schistosomiasis in coagulation cascade parameters.

50 diagnosed schistosomiasis patients and 25 healthy individuals whole were selected as study group after agreement of participation in this study.

4.5ml of venous blood was drawn from each participant in this study, placed in 0.5 tri sodium citrate container, then centrifuge to get platelets poor plasma (PPP) to assess Prothrombin time and Activated Partial Thromboplastin Time.

The results were analyzed using SPSS version14.0, and the mean of each parameter was calculated.

The correlation of PT level between case and control group show signcant increase in mean of PT among case group (18.9 sec) and control group (14.1 sec) with P.value (0.000).

The correlation of APTT level between case and control group show signcant increase in mean of APTT among case group (51.2 sec) and control group (36.2 sec) with P.value (0.000).

The study indicated there was an effect of schistosomiasis on coagulation cascade.

خلاصة البحث

هذه دراسه وصفية م قطعية عرضية انية أجريت في ولاية الخرطوم في الفتره من مارس على تخثر الدم 2013 لتحديد تأثيرالبلهارسيا على تخثر الدم

تم احتيار 50 شخص مشخصين كمرضى بلهارسيا تم أخذ 4.5 مليلتر من الدم الوردي من كل مريض وتم وضعه في حاويه دم تحتوى على 0.5 مانع تجلط ثلاثي سترات الصوديوم واستخلص المصل الدموي لا قياس زمن البروثرومبين, زمن الثرومبوبلاستين الجزئى المنشط وتم جمع 25 عينه من اشخاص أصحاء كمجموعه ضبط

وتم تحليل النتائج بواسطه برنامج الحزم الإحصائيه للعلوم الإجتماعيه إصداره 14. تمت م قارنة زمن البروثرومبين بين مرضى البلهارسيا والاشخاص الأصحاء وكان متوسط الزمن بين المرضى (18.9 ثانيه) ومتوسط الزمن بين الأصحاء (14.1 ثانيه

و ايضا تمت مقاردة زمن الترومبوبلاستين المنشط الجزئي بين مرضى البلهارسيا والاشخاص الأصحاء وكان متوسط الزمن بين المرضى (51.2 ثانيه) ومتوسط الزمن بين المرضى (الأصحاء و36.2 ثانيه).

واضحت الدراسه ان هناك تاثير واضح للبلهارسيا على تخثر الدم
