**Acknowledgments**

At the outset, thanks to Allah who endowed me with the power and health to complete this work. Deep appreciation goes to my esteemed supervisor Dr. Mudawi Mukhtar Al-Musharf for his tireless efforts, assistance, insightful ideas and supports throughout the research which proved to be a beacon of constant guideline. Also, I would like to acknowledge my brothers Hatim, Adil, Khalid, and Aymen who taught me how to go over misery especially when there is no incentive for seeing the brightest side of life. Their kindness and support have much contributed in encouraging me to pursue any professional endeavors. Especial thanks go to my “brothers” Bakri Jaras, Ahmed Attya, Dr. A/Moniem Al-Mashikhi, (Gedaref University), Mudather, Mohamed Abu Talib, Sayed Goutb, Emad Bakri, Mohamed Abdul Hai (The Read Sea University), Dr-Awatif Satti (University of Gazira), Dr. Dia'a Al-Deen, Dr. Maha, Dr. Manal, Montaser and Abbas from (SUST) for their valuable and thought-provoking suggestions. Deep appreciations go to the Students from the three universities who lively participated in the practical issue of the research. Special thanks to my beloved angles, my sisters, wife and my kids Elham and Amro for showing me how to smile.

Without the help of the above mentioned people, this work would not have been accomplished.
Abstract

This study attempted to investigate the possibilities offered by the integration of the Web-Based Instruction with the methods of teaching English at university level and its impact on developing EFL students Reading and writing skills. The essential goal of the research was to explore the issue of using web-based resources and materials to enhance teaching strategies and delivering of courses materials. The importance of the research lies in the fact that, the applications of web-based instructions for improving teaching strategies have drastically altered the ways in which English language should be taught. The most important question addressed was: How does web-based Instruction affect development of EFL Students Reading and Writing? The research adopted the empirical methods in which two different kinds of treatments have been implemented with two different groups (Control & Experimental) at three universities: Sudan University of Science and Technology, Gedaref University and University of Gazira. The main result generated from the analyses made, indicated that there are statistically significant differences between the two groups in terms of their achievements in the favour of experimental group. The findings encouraged the researcher to suggest that web-based materials and resources should be widely integrated along with the methods of teaching English to attain the desired outcomes. The researcher strongly recommended that CALL should be taught as a specialized course for EFL students at Sudanese universities.
