Appendix (A-1)

Data collecting form: Age: Marital status: Duration:..... Symptoms: Shape of the mass: Echogenicity of the mass: The number of masses: Consistency of the mass: Wall of the mass: Location of the mass: Calcification of the mass: Posterior phenomena: Combination of the mass with axillary lymph nodes: U/S findings FNAB findings

| | | | | | | | | | | | | | | | | |

4=no enhancement

3=no acaustic shadow

Appendix (B) Ultrasound images of benign masses

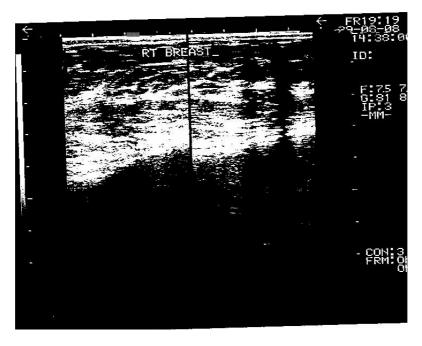

Image (1) showed patient of age 26 years had normal breast tissue

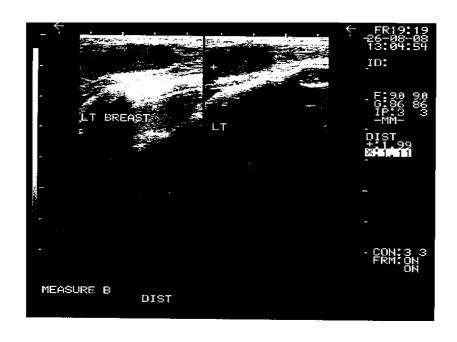

Image (2) showed patient of age 20 years had fibro adenoma

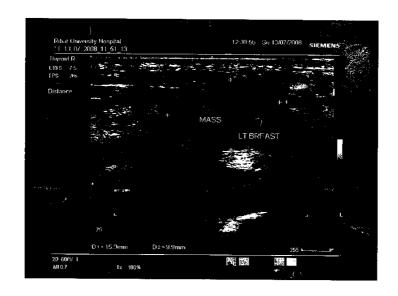

Image (3) showed patient of age 20s years had fibro adenoma

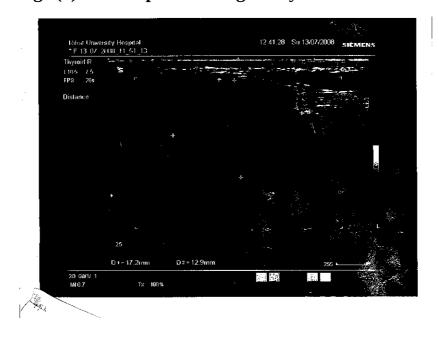

Image (4) showed patient of age 30 years had fibro adenoma

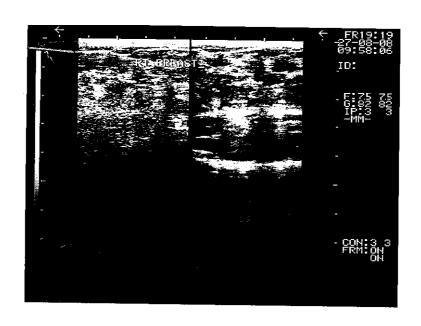

Image (5) showed patient of age 18 had normal breast tissue

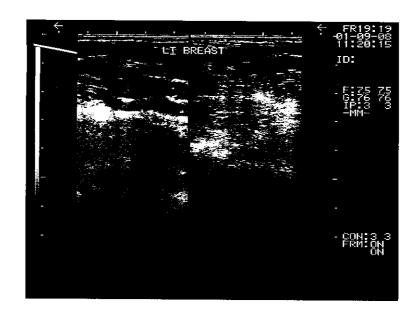

Image (6) showed patient of age 20 years had normal breast tissue

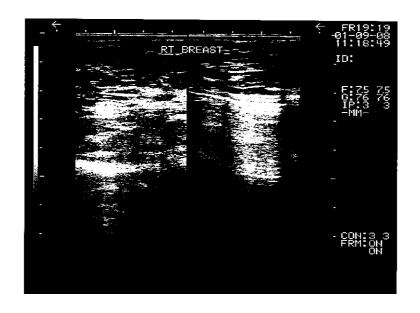

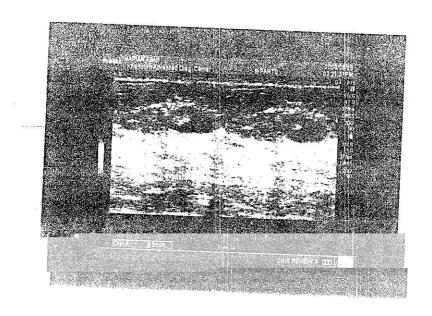

Image (7) showed patient of 26 years had normal breast tissues

Image(8) showed patient of age 28 had galactocele

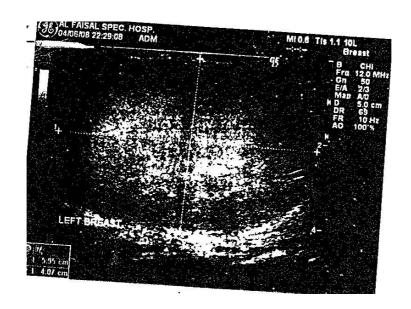

Image (9) showed patient of age 32 years had an abscess

Image (10) showed patient of age 27 years had fibro adenoma

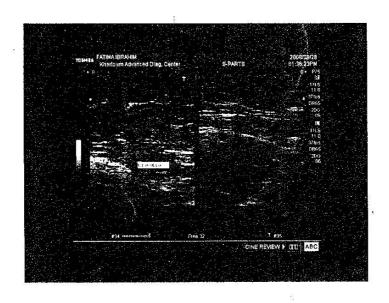

Image (11)showed patient of 27 years had fibroadenoma

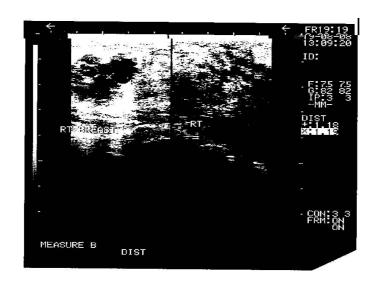

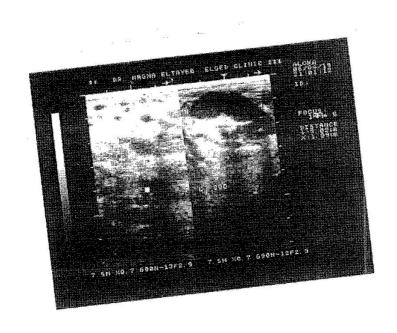

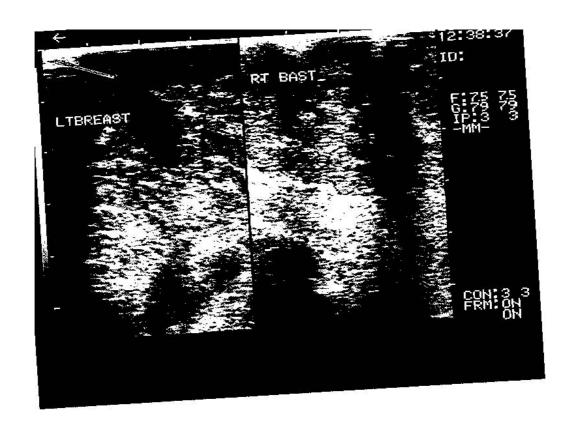

Image (12) showed patient of 30 years had ductectasia

Image(13) showed patient 30 years had galactocele

image(14) showed patient of age 26 years had normal breast tissue

Image (15) showed patients of age 22 years had fibro adenoma

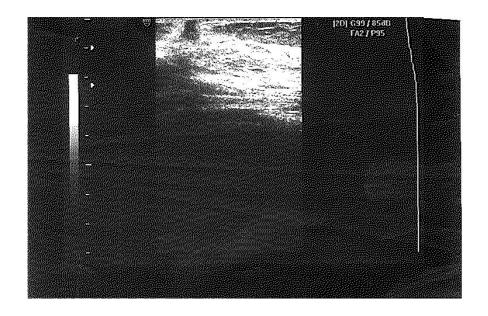

Image (16) showed patients of 25yeasr had fibro adenoma

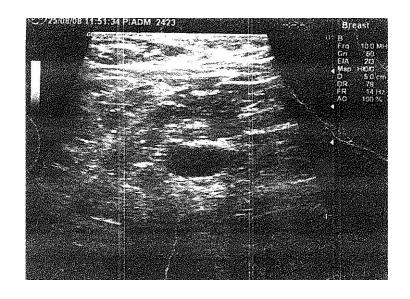

Image (17) showed patient of age 30 years had ductectia

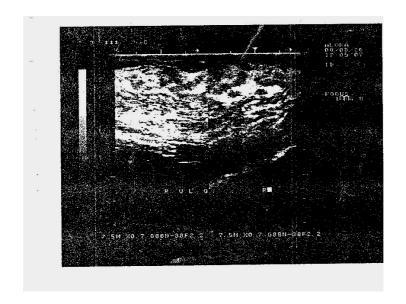

Image (18) showed patient of 19 years had fibro adenoma

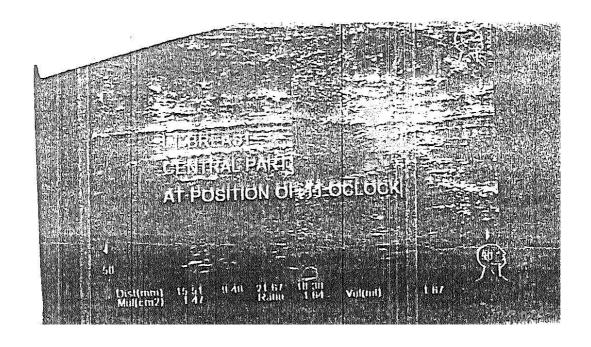

Image (19) showed patient of 20 years had fibro adenoma

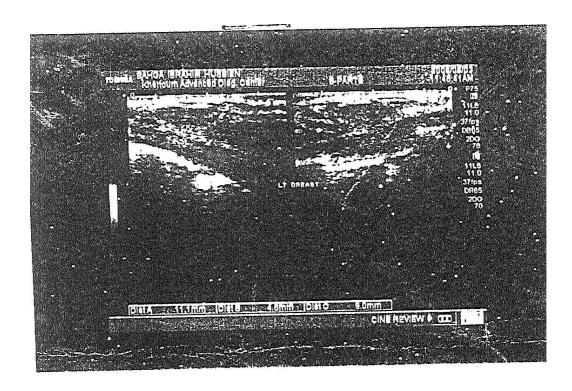

Image (20) showed patient of 35 years had fibro adenoma

15

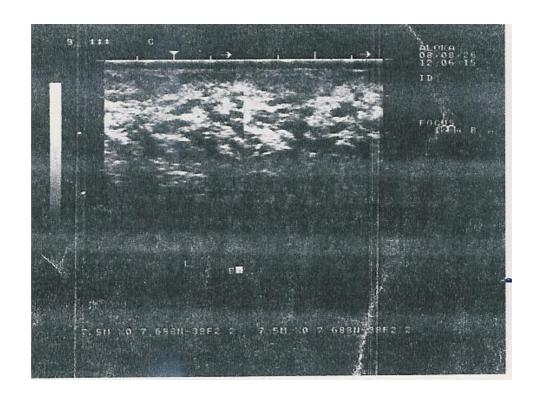

Image (21) showed patient of 35 years had fibrocystic adenoma

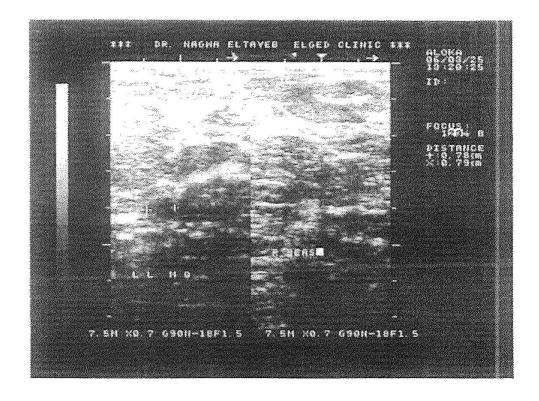

Image (22) showed patient of 35 years had fibrocystic adenoma

16

Image (23) showed patient of 23 years had axillary lymph nodes enlargement

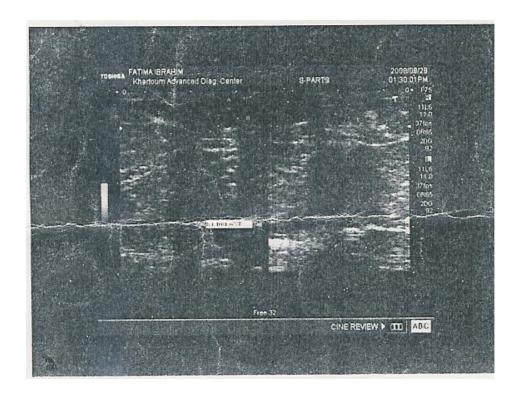

Image (24) showed patient of 27 years had fibroadenoma
