
Acknowledgements

First and foremost, I thank Allah (subhana wa taala) for endowing me with health, patience, and knowledge to complete this work. I wish to extend my greatest gratitude and gratefulness to my supervisor / Dr. Ali Eltom for his valuable guidance, advice and suggestions throughout this project. His effort and concern, that assist me to complete my project.

Acknowledgement is due to all staff of Civil Engineering Department, Sudan University of Science & Technology for the support given to this research through its excellent facilities and for granting me the opportunity to pursue my graduate studies with financial support.

Special thanks to ust. / Abou El Ezz Said and his assistants in concrete laboratory.

Also thanks are due to the company for construction (Shoahq).

A lot of thanks are due to my friends who were provided me with a high level of information. My thanks are extended also to all my colleagues and postgraduates of Construction Engineering Division for their support,
