## Chapter 1: Introduction

1.1 General
1.2 Genetic Algorithm in Control
1.3 fuzzy control
1.4 problem definition
1.5 objectives
1.6 Methodology
1.7 Thesis Layout

## Chapter 2: Traditional Controllers

2.1 Continuous-Time PID Controllers
2.2 Discrete PID Controller
2.3 Compensation
   2.3.1 Lead Compensator
   2.3.2 Lag Compensator
   2.3.3 Lag – Lead Compensator
4.2.5.2.1 Mean Of Maximum (MOM) 32
4.2.5.2.2 Leftmost (LM), and Rightmost Maximum (RM) 32
4.3 Post Processing 32
4.4 Genetic Algorithm Based Fuzzy Controller Design 32

Chapter 5: Case Studies & Simulation Results 33
5.1 General 33
5.2 Simulation Results 36
5.3 Traditional PID Controller 36
5.4 Lead Compensator 41
5.5 Lag compensator 46
5.6 Lag-Lead Compensator 50
5.7 Fuzzy Logic Controller 54

Chapter 6: Conclusion and Recommendations 59
6.1 Conclusion 59
6.2 Recommendations 60
