

Table of Figure

Chapter two: Literature Review

Fig.2.1. The wobble motor.....	13
Fig.2.2. The Smallbone axial engine.....	14
Fig.2.3. The Macomber axial engine	15
Fig.2.4. The Statax axial engine	16
Fig.2.5. The Almen aero engine	17
Fig.2.6. The internals of the Almen engine	18
Fig.2.7. The 7-litre Bristol axial engine.....	19
Fig.2.8. The swash plate engine.....	20
Fig.2.9. Michell axial engine.....	21
Fig.2.10. Longitudinal section of Michell engine.....	22
Fig.2.11. Section through piston and valve of Michell engine.....	22
Fig.2.12. Longitudinal section in front of swash engine and end view..	23
Fig.2.13. The Alfaro swash plate engine.....	24
Fig.2.14. The Laage axial cam aero engine.....	25

Chapter three: Design of Axial Engine

Fig.3.1. The cam plate.....	28
Fig.3.2. The main engine components	29
Fig.3.3. The cam block.....	30
Fig.3.4.The timing diagram in one revolution	31
Fig.3.5. The cylinder head.....	33
Fig.3.6.The piston and connecting rod.	34
Fig.3.7.The converging –diverging wedge bearing.....	34
Fig.3.8.The crank plate oil channels.....	36
Figure.3.9. How the axial engine works.....	38

Chapter four: Theoretical Background

Fig.4.1. Principle of hydrodynamic pressure generation between non-parallel surfaces	41
Fig.4.2. Equilibrium of an element of fluid from a hydrodynamic film.	44
Fig.4.3. Velocity profiles at the entry of the hydrodynamic film.....	47
Fig.4.4. Continuity of flow in a column.....	48
Fig.4.5. Pressure distributions in the long bearing approximation.....	52

Chapter five: Calculations

Fig 5.1. The connecting rod bearing & its velocities component.....	54
Fig.5.2. Geometry of a secant wedge Note the negative velocity.....	55
Fig.5.3. Pressure distribution with the Full-Sommerfeld boundary.... condition	58
Fig.5.3. Pressure distributions with the Half-Sommerfeld boundary.... condition	59
Fig.5.4. Pressure distribution with Reynolds boundary condition.....	62
Fig.5.5. Pressure fields for Full-Sommerfeld, Half-Sommerfeld and... Reynold boundary conditions	65
Fig.5.6. Viscosity-temperature graph for some monograde and..... multi-grade oils	67
Fig.5.7. The Dynamic viscosity–temperature graph.....	69

Chapter six: Results & Discussion

Fig.6.1. The variation of the force supported by the connecting rod bearing	73
Fig.6.2. The forces which is transmitted from the piston to the..... connecting Rod bearing	75
Fig.6.3. The forces which is transmitted from the piston to the..... connecting Rod bearing	76
Fig.6.4. The pressure distribution through the lubricant film.....	78

List of Table

Table.1.1.SAE classification of engine oils system	9
Table.1.2.ISO classification of industrial oils	10
Table.2.1.The Almen engine properties.....	18
Table .4.1 Summary of simplifying assumptions in hydrodynamics	43
Table.5.1. Extent of pressure fields and non-dimensional loads for Full- Sommerfeld, Half- Sommerfeld and Reynolds boundary conditions	64
Table.5.2.The conversion ISO-VG grade to SAE grade.....	68
Table.6.3. The forces which is transmitted from the piston to the connecting Rod bearing ($N \cdot 10^4$)	77
