Acknowledgement

All praise is due to Allah (SWT) who created man in the best form, guided him through His Messengers and made all that is between the heavens and the earth subservient to him towards discharging his responsibility as Allah’s servant and vicegerent on earth. May Peace and Blessings of Allah (SWT) be upon the unlettered Prophet, Muhammad b. 'Abdullah the Seal of the Prophets and Messengers, the teacher of the entire mankind?

My utmost gratitude goes to my late parents who toiled in my upbringing and early education that saw me through to this stage of life. May Allah (SWT) admit them into Jannah al-Firdaus.

I would like to thank my employers, Bayero University Kano for offering me study fellowship twice, to the United Kingdom and, currently, to Sudan on this doctoral degree.

I am most grateful to my supervisor, Dr Um Kalthoum (Thuraya)YousifIsmail for painstakingly going over and correcting my thesis in spite of her other academic commitments, and also for her moral backing during my difficult days in Sudan. I am also grateful to Professor Saud Sadig Hassan for his professional advice on this research work. I also wish to thank the formal Director of the Institute, Dr.Ibrahim Muhammad Sadig, for attaching me to Professor Saud.

I would particularly like to thank Professor Muhammad SaniZahradeen, former Vice Chancellor of Bayero University Kano and currently, the Chief Imam of Kano. His tremendous influence on my academic career is gratefully acknowledged. This research work is a humble effort to provide the architectural aspect to his well researched paper on the place of mosque in the history of Kano.

ABSTRACT

This study aims to investigate the effects of regional diversity on mosque architecture of Nigeria’s post-independence era with particular reference to Kano mosques. A historical survey was made on the evolution of mosque architecture right from its prototype structure based on the Masjid al-Nabawi in Madinah built in the year 622CE.

The research studied the foreign elements which were incorporated into the main mosque building. The research found that apart from minbar (pulpit) and mihrab (niche), the other main features of the mosque namely, the manarah (minaret) and qubbah (dome) were totally alien features. Both the dome and the minaret were originally Romano-Byzantine structures incorporated into the main mosque building at a much later period. The research discovered that both the Sasanian and Mughal influences took longer period before their complete incorporation into the mosque architecture.

Furthermore, the research identified increased Islamic architectural influences on other building structures besides mosque such as palaces, city gates and other public buildings in the country. The study also found urban development as a key factor in the rapid construction of mosques in urban Kano and its outskirts, in addition to the increase in affluence as a result of the oil boom in Nigeria. The research concludes with a discussion of the position of the mosque between its forms, on the one hand, and its functions, on the other. This is done against the background of over emphasis on the former over the latter in the contemporary Muslim world.
مستخلص البحث

تهدف الرسالة إلى بحث الآثار الإقليمية المتنوعة في عمارة المساجد (بدولة نيجيريا) بعد الاستقلال، مع الإشارة الخاصة إلى مساجد كانو. و(قد) قدم مسحا تاريخيا لتطور عمارة المسجد منذ هيكلها النموذجي الأول، المتمثل بالمسجد النبوي بالمدينة والذي بنى في العام ٢٢٢م.

تناول البحث العناصر الأجنبية، والتي تم دمجها في مبنى المسجد الرئيسي. و بغض النظر عن المنبر والمحراب فقد عثرت الدراسة على بعض السمات الرئيسة في المساجد كالمنارة والقبة، رغم أنها أجنبية تماما، و كانت من الهياكل الرومانية، والتي تم دمجها في المبنى الرئيسي للمسجد في الفترة الأخيرة. وكذلك كشف البحث عن كثر كل من الفرس الساسانيين والمغول بأنه قد أخذ فترة طويلة قبل إتمام عمارة المسجد. و إضافة إلى ذلك، فقد أظهر البحث تأثير العمارة الإسلامية في بعض المباني بجانب المساجد مثل القصور وأبواب المدينة والمباني العامة الأخرى في البلاد. وكما عثرت الدراسة على أن التنمية الحضرية عاملا رئيسا في سرعة بناء المساجد في كانو وضواحيها، إضافة إلى زيادة الوفرة. نتيجة الطفرة النفطية في الدولة (نيجيريا).

وتلخصت الدراسة في مناقشة دور المساجد بين هيكلها من جانب ووظائفها من جانب آخر. ثم هذا ذنباء عن التركيز على أشكال المساجد أكثر من الجانب الوظيفي في العالم الإسلامي المعاصر.
