In a three-paragraph topic (at least) write about the situation in Gaza Strip under the Israeli occupation, the present situation under the auspices of Palestinian National Authority PNA, and your future expectations. (Write No less than 200 words)

---

Gaza Strip is a small piece of land which contains a very large number of people. This strip has faced a lot of challenges which affected it, and still affects it, influencing its people. For example, its situation under the Israeli occupying the present situation under the auspices of Palestinian National Authority, and the future expectations.

First of all, the situation in Gaza Strip under the Israeli Occupation had many negative effects on people, economy, and agriculture. For example, a large number of people were martyred, imprisoned, or even injured by the occupation. Their families were the first who suffered from this situation. Accordingly, this led to a severe recession in the field of economy. These people were either workers or customers in it. Moreover, the ruining of factories and ports was something that its effects cannot be ignored at all. Above all, the wrecking of crops and plants had the main reason for the condition of the Strip. Since it is its main source of economy, such as, planting citrus, trees, and strawberry.

To observe the situation now under the auspices...
of Palestine. National Authority, it is very, very unstable
and worrying. The strip is in a situation that needs a lot
of efforts and mass work. It is needed to be rebuilt again
in its different fields that any society would depend on.
Moreover, to obtain such a desire, a lot of efforts
and money is needed. Regarding the efforts, it is sure
that no one can keep his/her efforts to build his/this country. However, the money issue is something
very difficult, especially with an empty exchequer
and banks that cannot deliver the helps.

The most important and mystery point is my
future expectations. It is, in fact, something that can
not be measured or recognized in any way. Every day we
are exposed to new news and ideas. Still, these ideas
are not born to reality yet. Consequently, it gives a
negative feeling about the future. On the other hand,
dealing with an authority which depends on Allah first
of all and keeps the outward looking at it in a cheerful
different way, can give some positive intentions about
what could happen.

Finally, it can be said that such a strip with all the
challenges can stand very strongly to face any arranged wind.
