Determination of Combustion Temperature and Thermodynamic Properties of Combustion Products for Internal Combustion Engines

Thesis submitted in partial fulfillment for the requirements of the degree of Master (M. Sc.) in Mechanical Engineering (Power)

Prepared by:

Ahmed Osman Beshir Hassan

Supervised by:

Prof. Dr. U. S. AbdulHussain
Chapter One

Introduction
Chapter Two
Literature Review
Chapter Three
Concepts and Definitions
Chapter Four
Theoretical Background and Methodology
Chapter Five

Results and Discussion
Chapter Six
Conclusions and Suggestion
Appendix 1
