

Acknowledgement

I fully thank Allah upon the completion of this thesis, hence countless thanks to Allah the Great Creator.

I am indebted, first, to Dr. Abdalla Yassin Abdalla, my supervisor for the expert advice and guidance he has given me throughout, not forgetting his patience when progress was slow.

Thanks are also due to, Prof. Mohammed Al-Busairi Mohammed, Department of English, University of Khartoum, for his invaluable feedback on my early plans. My thanks extended to Ustaz Hilary Marino for his assistance.

I would like to extend my thanks, in particular to Dr. Hamid Homaida, Department of Statistics, Sudan University of Science & Technology, for offering his support and practical help so generously at all times.

I am grateful to my husband, for his support, assistance and encouragement, which actually without it would have been impossible to achieve this work.

My final acknowledgement must be to my family for their assistance to complete this thesis.
