

Dedication :

This thesis is dedicated to my parents, who have supported me all the way since the beginning of my studies.

Acknowledgements :

First I am thankful to Almighty ALLAH, who gave me strength to finish this thesis.

I would also like to thank my supervisor, Dr. Abd Alrasoul Alzebadi whose encouragement, guidance and support enabled me to develop a good understanding of the subject and finish my thesis.

Special thanks to my, two elder sisters, and elder brother, they were always supporting me and encouraging me with their best wishes.

I would also like to thanks my guardians and a family member, whose' Prayers, love and appreciation strengthened me to achieve my work. Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of master.

Abstract:

Remote patient monitoring lead to improve quality of patient care on general hospital wards, and it refers to a wide variety of technologies designed to manage and monitor a range of health conditions, remote patient monitoring (RPM) has shown itself as a viable option and it could even become a standard clinical pathway.

duty personal care assistants, the observer's sole responsibility is a notify staff when the patient engages in happen self-injurious behavior, such as getting out of bed without assistance or pulling out tubes and nurses cannot be stable at the centralized nursing station to view patient vital signs and the status of medical equipment in the patient's room — from ECG machines to respirators and more.

System remote patient monitoring provides patients full control of their rooms and reduce the movement of nurses in hospitals and medical facilities and intensive care unit, as well as follow-up of patients in remote hospitals, for surveillance their situation to determine the medical needs them by a specialist doctor even easier for Medical staff provide the necessary medical needs.

In this thesis programmed PLC SIMATIC S7-200 to control and operate the stepper motor then proved on it camera wireless is rotating round the patients to monitor their conditions and it connected to computer via access point and used internet protocol (IP) technology to enable the doctors and nurse to see and talk with their patients on video remotely in any place.

Resulting in more effective and efficient care for patient and remote patient observation system can complement the role of nurses in monitoring patients by vide, they will be able to focus on holistic needs of patients thereby providing better personal care.

المستخلص :

مراقبة المرضى عن بعد تؤدي الي تحسين جودة رعاية المرضى في أجنحة المستشفى العام, وتشير الي مجموعه واسعه من التكنولوجيات المصممه لادارة ورصد مجموعه من الظروف الصحيه وتقنية رصد المرضى عن بعد فرضت نفسها كخيار مناسب وانها يمكن ان تصبح معيار للطرق السريره .

واجب مساعدي الرعاية الشخصية، ومسؤولية المراقب هو إعلام الموظفين عندما يشارك المريض في أن يحدث السلوك المضر بالنفس، مثل الخروج من السرير دون مساعدة أو سحب الأنابيب والممرضات لا يمكنهم أن يكونوا مستقرين في محطة التمريض المركزية لعرض المريض الحيوية علامات وحالة المعدات الطبية في غرفة المريض - من أجهزة تخطيط القلب أجهزة التنفس الصناعي وغيرها.

نظام مراقبة المرضى عن بعد يوفر السيطرة الكاملة المرضى من غرفهم والحد من حركة الممرضات في المستشفيات والمرافق الطبية وحدة العناية المركزة، وكذلك متابعة المرضى في المستشفيات النائية، لمراقبة حالتهم لتحديد الاحتياجات الطبية لهم من قبل الطبيب المختص حتى يسهل على الطاقم الطبي توفير الاحتياجات الطبية اللازمة.

في هذا النظام يستخدم تحكم منطق البرمجه للتحكم في تشغيل الموتور الذي ثبت عليه كاميرا لاسلكيه تدور حول المرضى لرصد احوالهم وتوصل الي الحاسوب عبر نقاط وصول وتستخدم تقنية بروتكول الانترنت لتمكين الاطباء والممرضات من التحدث ورؤية مرضاهم على الفيديو في أي مكان.

والنتيجة أكثر فعالية ورعايه فعّاله للمريض وهذا النظام يكمل دور الممرضات في رصد المرضى عن طريق الفيديو وانها تكون قادره على التركيز على الاحتياجات الشامله للمرضى وبالتالي توفير رعايه صحيه افضل.

Table of Content

الايه.....	I
Dedication.....	II
Abstract.....	III
المستخلص.....	IV
Acknowledgements.....	V
Table of Content.....	VI
List of Figures.....	VII
List of Tables.....	VIII
Abbreviations.....	IX

Chapter one

1.Introduction	2
1.1Telemedicine Defined.....	2
1.1.1 Services Can Be Provided By Telemedicine.....	4
1.1.2 Delivery Mechanisms Can Be Used.....	5
1.1.3 The Benefits of Telemedicine.....	5
1.2 Problem statement.....	6
1.3 Objective.....	7
1.3.1 General objective.....	7
1.3.2 Specific objective.....	8
1.4 Methodology.....	9
1.4.1 SIMATIC S7-200(PLC).....	10
1.4.2 Camera wireless.....	11
1.4.3 Stepper Motors and Drives.....	12

1.5 Research plan.....	12
------------------------	----

Chapter Two

2. Literature Review.....	15
2.1 A Wireless PDA.....	15
2.2 Mobile Phones for Mother and Child Care.....	16
2.3 Remote Patient Monitoring in China.....	17
2.4 Remote Non-Intrusive Patient Monitoring.....	18
2.5 Code Blue.....	19
2.6 An Advanced Wireless Sensor Network.....	20
2.7 Internet Based Monitoring.....	21

Chapter Three

3. Electronic Circuit Design	28
3.1 SIMATIC S7-200(PLC).....	29
3.1.1 Driver with PC Access.....	30
3.2 Secur View Wireless N Day/Night Internet Camera.....	31
3.2.1 Overview.....	31
3.3 Stepper motor.....	32
3.3.1 Introduction to Stepper Motors and Drives.....	32
3.3.2 Stepper Motor Advantages.....	33
3.3.3 Types of Step Motors.....	33
3.3.4 Step Modes.....	34
3.3.5 Linear Motion Control.....	36
3.3.6 Series vs. Parallel Connection.....	36
3.3.7 Driver Technology Overview.....	37

Chapter four

4. Introduction to Programmable Logic Controller.....	40
4.1 Application of PLC.....	40
4.2 PLC Component.....	41
4.3 PLC scan cycle.....	44
4.4 The Cycle time PLC	45
4.5 Advantage of PLC.....	45
4.6 disadvantage of PLC.....	45
4.7 PLC size.....	46
4.8 PLC programming.....	46
4.9 PLC company.....	47
4.10 SIMATIC family.....	47
4.1 S7-200 micro PLC.....	47
4.12 programing language of PLC	49
4.12.1Nemonic Instruction.....	50
4.12.2 Sequential Function Charts (SFC).....	50
4.12.3 Structured Text (ST).....	50
4.12.4 Function Block Diagram (FBD).....	50
4.12.5 Ladder Logic.....	51
4.13 The Program In Ladder Logic Diagram Language.....	54

Chapter Five

5. Result and Discussion.....	61
5.1 Result.....	61
5.2 Discussion.....	62

Chapter Six

6. Conclusion and Recommendation.....	64
6.1 Conclusion.....	64
6.2 Recommendation.....	65
6.3 Reference.....	66
6.4 Appendix.....	72
