

الاية

بسم الله الرحمن الرحيم

قال تعالى:

يُكَلِّفُ اللَّهُ (نَفْسَهُمَا إِلَّا وَكُسِدَ جَعَتْ نَجَّوَجَ عَلَيَّهَا مَا مَا كَتَسَبَت رُبَّنَا لَا
تُوْا خَوْنَبُنَّا إِنْ لَأَسَّ تَجَامُولُ أَخْطِيَانَنَّا إِصْرًا كَمَا حَمَلْتَهُ عَلَى الَّذِينَ مِنْ
رَبَّنَا وَقَبْلَ لَنُحْجَّ لَنَا مَا لَوْلَا عَطْفَةُ لَعَلَّنَا بَوِطَّ عَفْرًا لَنَا وَارْحَمْنَا جَمَوْلَا نَا
نَصْرًا نَاعَلَى الْقَوْمِ الْكَافِرِينَ)

صدق الله العظيم

البقرة ﴿٢٨٦﴾

DEDICATION

To our mothers who candle the light to
our life.....

To our fathers who spend all their life to
help us.....

To our sisters, brother, daughter, sons
& all our families.....

To our teachers.....

To our colleagues....

Acknowledgments

Firstly, I would like to express my thanks to Allah who helped us to submit our research. To mention a few, we immeasurably indebted to Dr. **Elmegdad Ahmed Ali**, our supervisor, who generously gave of his time at moments that were more to our convenience than his, and whose judicious advice has been a guiding star not only to this study, but to my perception of scientific inquiry at large. Countless thanks are offered to our parents who always believe in us and our friends for their help and support.

Abstract

In this study was prepared benzohydroxamic acid by coupling reaction between methyl benzoate and free hydroxylamine and identified by their melting point, color test and infrared spectroscopy.

المستخلص

تم تحضير مركب حمض بنزوهيدروكسميك باقتران هيدروكسيل أمين حر واستر بنزوات الميثيل وتم التعرف عليه بقياس نقطة الانصهار وتكوين معقد ملون مع الحديد III وبجهاز الأشعة تحت الحمراء .

Table of content

Title	Page No.
الاية	I
Dedication	II
Acknowledgment	III
Abstract	IV
المستخلص	V
Table of content	VI
Chapter One	
Introduction	
1.1: Introduction	1
1.1.1: Definition and structure of hydroxamic acid	1
1.1.2: hydroxamic acid general formula	1
1.2 Nomenclature	2
1.3 properties of hydroxamic acid	5
1.3.1 physical properties	5
1.3.2: Characterization	5
1.3.2.1: Color test	5
1.3.2.2: Infrared	6
1.3.3: Chemical properties	7
1.3.3.1: Oxidation	7
1.3.3.2: Rearrangement	8
1.3.3.3: Nucleophilic reaction	8
1.3.3.4: Hydrolysis	9
1.3.3.5 Metal complex formation	9
1.4: Preparation of Hydroxamic acids	11
1.5: Application of hydroxamic acid	12

1.5.1: Analytical application of hydroxamic acid	12
1.5.1.1: Gravimetric application	12
1.5.1.2: Spectrophotometric application	14
1.5.2: Biological activity of hydroxamic acid	15
Chapter Two	
Experimental and Results	
2.1: Apparatus and instrument	17
2.2: Materials	17
2.3: Preparation of Methyl Benzoate	18
2.4: Preparation of hydroxyl amine	19
2.5: Preparation of benzo hydroxamic acid	19
2.6: Recrystallization	19
2.7: Characterization of hydroxamic acid	20
2.7.1: Melting point	20
2.7.2: Color reaction	20
2.7.3: Infrared spectroscopy for benzo hydroxamic acid	20
Chapter Three	
Discussion	
Discussion	21
