Abstract

The aim of this study to show the psychological adjustment and its relationship to some demographic among students in Guran Khalawi's. The Original Population of this study of Khartoum in Ombada Students are about (450)students. There were systemically randomly selection for (40) student these are the samples of this study "the researcher uses analysis of data and this analysis there is a strong relation between the psychological adjustment and some demographic variable there is correlation between the psychological adjustment and age of Khalawi students the important recommended these:

Characterized by pupils Quranic psychological adjustment.

Khalawi should be the voice of development on health. Psychological.

State, local and national after statistical Since this study the Khalawi should be the spiritual oasis to approximation of detective religion to the coming generations and to make them love it and publishing the principles and the practices to attract them.

The advanced Khalawi must include other materials as to help the students to expand their cognitive.

The teacher of Khalawi should be trained on the modern educational methods and being out of the traditional methods like beating and others.

The government should provide a helping hand to these Khalawi so as to be able to develop its fields and services.
