ACKNOWLEDGEMENT

I am deeply indebted with acknowledgement to my supervisor Dr. Abdalbasit Adam Mariod with ultimate appreciation, respect and gratitude for his supervision of this work.

Awarm thanks to Dr. Omer Eltaieb and Ustaz Habib from University of Khartoum, and Ustaz Hassan Ansary from University of Gazira for their ultimate assistance, encouragement, guidance and keen interest during the laboratory work. Thanks are also extended to those who cooperated but not mentioned here. And very special thanks to my family and my husband for their encouragement and praying to me.
