

Dedication

*To my Guarding Angle my husband
Dr. Amin who pave me long way with
advices and support.*

*To my beloved Parents who always
open their hearts for me, offer their love and
prayers.*

To my brothers who always support me.

Acknowledgement

I would like to express my sincere Gratitude and indebtedness to Dr. Malik Hassan Ebrahim for his expert guidance, kind encouragement, continuous support and supervision.

My great thanks expressed to all Hematology department in Sudan university of science and Technology.

Last but not least, a lot of thanks are extended to every one who encouraged, advised and helped me to complete this project

الخلاصة

هذه دراسة وصفية مقطعيه هدفت لتحديد نسبة تردد الزمر الوظيفية و النمط الظاهري لأنظمة (ABO,Rhesus (D)and Kell (K1,K2) في قبيلة الدينكا السودانية.

هدفت الدراسة لتكوين قاعدة معلومات لهذه الزمر الوظيفية ومقارنتها مع القبائل السودانية قد استغرقت هذه الدراسة ثلاثة أشهر فى الفتره من مارس الى مايو ٢٠٠٧ . أخذت الموافقة من المتطوعين وقد تمت إحاطتهم بأهداف البحث. تم تجميع مائه عينه من إفراد القبيلة بحيث لا توجد بينهم صله قرابة، تم سحب ٥ ٢ مل من الدم ووضعها في وعاء يحتوى على ماده مانعه لتجليط الدم. تم اختبار جميع العينات لمعرفه الزمر الوظيفية لأنظمة ABO& Rhesus (D) Kell (K1and K2) بطريقه الشريحة . ولاختبار انتجينات استخدمت طريقه حديثه تعرف Gel microtyping . تم تحليل البيانات بالحاسوب باستخدام برنامج Statistical package for social science و تم تحديد التشابه بين القبائل باستخدام قانون جاكرد للتشابه ، أظهرت النتائج أن الزمره الوظيفية O كانت الأكثر ترددًا بين إفراد القبيلة بنسبة تردد (٤٨%) تليها A (٢٣%) ثم B (٢٠%) وأخيرا AB (٩%) كما تبين أن الزمره الوظيفية (D) Rhesus كانت بنسبة تردد (٩٦%) ، بينما K2 كانت الأكثر ترددًا بنسبة (١٠٠%) ، بينما K1 كانت بأقل نسبة وهى (٥%). وقد خلصت الدراسة أن نسبة الزمرة الوظيفية ABO في قبيلة الدينكا أقرب للنسبة التي وجدت لدى الأمريكيين السود وابعد ما تكون عن الأمريكيين البيض و البريطانيين. بينما (D) Rhesus أقرب للأمريكيين و الإفارقه السود وابعد ما يكون عن البريطانيين وكانت نسبة تردد K1 أقرب للباكستانيين و الفلبينيين وابعد عن الأمريكيين السود و العرب بينما K2 كانت أقرب للباكستانيين و البريطانيين . التشابه بين بعض القبائل السودانية يرجع إلى عيشهم في مناطق قريبه من بعض ويعزى الاختلاف إلى طبيعتهم الترحاليه .

Abstract

This was prospective and cross – sectional study that aimed to determine the frequency of ABO, Rhesus (D) and Kell (K1, K2) antigens and phenotypes among the Denka Sudanese tribe. Study also aimed to construct a data base regarding to these antigens. This study was conducted during three months (March – June 07) in Khartoum state. Following informed consent, a total of hundred individuals were bled. 2.5 ml of venous blood was collected into EDTA containers. All samples were tested for ABO, Rh (D) antigens by slide technique, whereas the Kell (K1and K2) were tested by modern technique called gel micro-typing. The results were analyzed using statistical package for social science program. Similarities between this tribe and other Sudanese tribes and tribes from other countries were calculated using Jacard's coefficient similarities. Regarding to ABO blood group system our results showed that the O blood group was most common with the frequency of 48% followed by A blood group with the frequency of 23% and B blood group was 20% whereas the AB was the least common with frequency of 9% . Rhesus (D) antigen frequency was found to be most commonly frequent with the frequency of 96%. The Kell-2 frequency was found to be 100%, while Kell -1 was 5%. The conclusion of the study was that frequency of ABO blood group was found to be close to that found in people of African American race and far from that found in the American of the united state and the British populations while the frequency of Rhesus (D) antigen was found to be close to the frequency of American and African Blacks , and far away from that of British population , the frequency of Kell -1 in the Denka population was found to be close to that found in Pakistan and Finns population and it was far away from that found in U.S blacks and Arabian population and kell -2 was found close to Pakistani and English populations .Similarities between some Sudanese tribes could be explained by the same location while the differences may due to there wandering nature .

List of abbreviations

Name	Abbreviation
Arg	Arganine
CGD	Chronic granulomatous disease
cDNA	Cytoplasmic Deoxyribonucleic acid
C	Cytosine
Cys	Cysten
Del	Delition
DNA	Deoxyribonucleic acid
ECE	Endothelin-converting enzyme
EDTA	Ethyle diamine tetra acetic acid
ET	endothelin
Fue	Fucose
FGF	Fibroblast growth factor
Gal	Galactose
HTR	Hemolytic transfusion reaction
HDN	Hemolytic disease of newborn.
ID	Immuno-diffusion
IgG	Immunoglobulin G
IgM	Immunoglobulin M
IAT	Indirect antiglobulin test
ISBT	International society of blood transfusion
JS^a	KEL 6
JS^b	KEL 7
K-1	Kell-1
Kp^a	Kell-3
Kp^b	Kell-4
KD	Kilo Dalton
KP^c	KEL21
LISS	Low ionic strength solution
mRNA	Messenger Ribonucleic Acid
NEP	Neutral endopeptidase
PCR	Polymerase chain reaction
PET	Positron emission tomography
RAZ	KEL27
RBCs	Red blood cells
Rh	Rhesus blood group system
Rh (D)	Rhesus D antigen
SEP	Secreted endopeptidase
SPSS	Statistical Package for Social Science
T	Thymine
UK	United Kingdom
USA	United States of America

Abstract (Arabic)	III
Abstract (English)	IV
List of Abbreviations	V
List of content	VI
List of tables	VIII
List of Figures	IX

Chapter One

1.1	General introduction	1
1.2.1	General introduction to ABO blood	1
1.2.2.	Classification of ABO blood group	2
1.2.3.	inheritance of ABO blood group gene	3
1.2.4.	The role of H gene in the expression of ABO genes	3
1.2.5.	Cis- AB phenotype	4
1.2.6.	The distribution of ABO blood group	4
1.2.7	blood group system antigen	5
1.2.8	ABO blood group system Antibodies	6
1.3.1.	Clinical significant of ABO blood group	6
1.3.2	Hemolytic transfusion reaction	6
1.3.3.	Hemolytic disease of new born	6
1.4.1.	General introduction of Rhesus blood group system	7
1.4.2.	Nomenclature and genetic theories	8
1.4.3.	The fisher - Race nomenclature	8
1.4.4.	The Wiener nomenclature	8
1.4.5.	The Rosen field nomenclature	9
1.4.6.	The Rhesus D antigen	9
1.4.7.	Weak D phenotype	9-10
1.5.1.	General introduction to kell blood group	11
1.5.2.	The genetic of kell blood group system	11-13
1.5.3	The antigens of kell blood group system	13
1.5.4.	Kell-1 and kell-2 antigen	13
1.5.5.	Kell-3 and Kel-14	14
1.5.6.	Kell21	14
1.5.7.	Kell-6 and kell-7	15
1.5.8	Kell 11	15
1.5.9.	Kell 17	15
1.5.10.	Kell 10	15
1.5.11.	Racial distribution of kell types	15
1.5.12	Nomenclature of kell blood group system	18
1.5.13.	The kell blood group system antibodies	19

1.5.14	Causes of fetal anaemia related to anti Kell-1	20 -21
1.5.15.	Depressed kell antigen	21
1.5.15.1	Kell null phenotype	21-22
1.5.15.2	McLeod phenotype	23
1.5.15.3	McLeod syndrome(XK, IV2Ds,G-A+1)	24
1.5.15.4	McLeod syndrome(XK, IV2AS,G-A-1)	24
1.5.15.5.	McLeod syndrome(XK,1-BP DEL)	24
1.5.15.6.	McLeod syndrome(XK,1-BP DEL 1095T)	24
1.5.15.7.	McLeod syndrome (XK,CY S294 AR6)	25
1.5.15.8.	McLeod syndrome(XK,13-BP DEL)	25
1.5.15.9.	McLeod syndrome(XK,TRP314 TER)	25
1.5.15.10.	McLeod syndrome(XK,GLN99 TER)	25
1.5.15.11.	K mod RBCs phenotype	26
1.5.15.12.	RAZ and kell(25) VlaV antigen	26
1.6.1	General objective	27
1.6.2.	Specific objective	27
1.7.	Rational	28

Chapter Two

2.1	Study population	29
2.2	collection of specimens	29
2.3	Inclusion criteria	29
2.4	Exclusion criteria	29
2.5	method	29
2.5.1.	ABO grouping method	29
2.5.2.	Test procedures	29
2.5.3.	Interpretation of result	29-30
2.5.4.	Kell-1 and kell-2 grouping method	30-31
2.5.5.	Reagent and materials	32
2.5.6.	Blood sample	32
2.5.7.	Test procedures	32
2.5.8.	Interpretation of results	32
2.5.9.	Controls	33
2.5.10	Data analysis	33

Chapter Three

3	Results	34
---	---------	----

Chapter Four

4.1	Discussion	48-49
4.2	Conclusion	50
4.3	Recommendation	51

Chapter Five

5	References	52-58
	Appendices	59-65

List of Tables

1.1.	Classification of ABO blood group	2
1.2.	The distribution of blood types among various population	4
1.3.	The racial distribution of kell types	15
1.4.	The comparative positivity analysis of kell 1	16
1.5.	The comparative positivity analysis of kell 2	16
1.6.	The phenotype Frequency in kell blood group system	16
1.7.	The phenotype Frequency in kell blood group system among white & blacks	17
1.8.	The antigen of kell blood group nomenclature and frequency	18
3.1.	The gender frequency and percentage	35
3.2.	The blood group frequency and percent	36
3.3.	The blood group frequency and percent among gender	37
3.4.	The Rhesus D antigen frequency and percentage	38
3.5.	The Rhesus D antigen frequency and percentage among blood group	39
3.6.	The kell-1 antigen frequency and percentage	40
3.7.	The distribution of kell -1 antigen among gender	41
3.8.	The kell-2 antigen frequency and percentage	42
3.9.	The distribution of kell -2 antigen among gender	43
3.10.	The kell phenotype , frequency and percentage	44
3.11.	The distribution of kell-1 antigen among ABO blood group	45
3.12.	The distribution of kell -2 antigen among ABO	46
3.13.	The distribution of kell phenotype among ABO blood group	47

List of figures
