

## List of Figure

<b>2.1</b>	The Road Map For LTE In 3GPP From Global Mobile future Suppliers Association .....	5
<b>2.2</b>	Long Term Evolution Architecture.....	8
<b>2.3</b>	Control Plane Protocol Stack.....	10
<b>2.4</b>	User Plane Protocol Stack .....	10
<b>2.5</b>	Multiple Access Schemes For Downlink.....	13
<b>2.6</b>	Multiple Access Schemes For Uplink.....	13
<b>2.7</b>	Generic Frame Structure.....	14
<b>2.8</b>	LTE Uplink Resource Grid.... ..	15
<b>2.9</b>	Resource Element Mapping Of Reference Signals For Single AntennaOnly.....	16
<b>3.1</b>	Power Control is One of the Functionalities of the Link Adaptation Unit .....	17
<b>3.2</b>	PUSCH Power Control Parameters Broadcasted by the eNB towards the UE.....	21
<b>3.3</b>	Block diagram of Steps Involved in Setting Uplink Power Using open loop power contrl.....	23
<b>3.4</b>	power control schemes categorized based on the value of $\alpha$ ...	25
<b>3.5</b>	Block diagram of steps involved in adjusting open loop point of operating using closed loop power control .....	30
<b>3.6</b>	Generation of the TPC command at the eNB.....	32
<b>3.7</b>	Combined open loop and closed loop with interference.....	37
<b>4.1</b>	GUI for the Uplink Power Control Mechanisms.....	48
<b>4.2</b>	Open Loop Power Control.....	49
<b>4.3</b>	Conventional Closed Loop Power Control.....	50

---

<b>4.4</b>	Generalized Interference Power Control Algorithm.....	50
<b>4.5</b>	Parameter of User Throughput .....	51
<b>4.6</b>	Parameter of Cell Throughput.....	52
<b>4.7</b>	The Power Spectral Density Parameters.....	53
<b>4.8</b>	The Carrier To Interference Noise Ratio Parameters.....	54
<b>4.9</b>	Combined Open and Closed Loop Power Control.....	55
<b>4.10</b>	PSDtx vs Path Loss Factor (FPC).....	56
<b>4.11</b>	PSD Compensation vs. Path gain.....	57
<b>4.12</b>	PCL vs Correction Factor.....	58
<b>4.13</b>	Power Closed Loop vs Path Loss Factor.....	60
<b>4.14</b>	User Throughput vs Number Of Physical Resource Block.....	61
<b>4.15</b>	User Throughput vs Carrier To Noise Ratio.....	62
<b>4.16</b>	Cell Throughput vs Number Of Physical Resource Block.....	63
<b>4.17</b>	Cell Throughput vs Number Of User.....	64
<b>4.18</b>	Power Spectral Density vs Interference Power Spectra Density.....	65
<b>4.19</b>	Power Spectral Density vs Path Gain To Nerest Interfered BS. Signal To Noise Ratio vs Path Gain.....	66
<b>4.20</b>	Signal To Noise Ratio vs Interference Power Spectral Density.....	68
<b>4.21</b>	Path Loss vs Prb.....	70
<b>4.22</b>	PSDtX vs Delta UE.....	71
<b>4.23</b>	Path Loss Factor vs Power Transmission.....	72
<b>4.24</b>	Power Spectral Density vs Power Transmission.....	73
