

Chapter One

Research Introduction

- 1.1 Introduction
- 1.2 Problem statement
- 1.3 Research questions/ Hypothesis
- 1.4 Research Philosophy
- 1.5 Research Objectives
- 1.6 Open research areas
- 1.7 Research scope
- 1.8 Proposed solution
- 1.9 Methodology
- 1.10 Thesis Organization

Chapter Two

Background

2.1 Introduction.

2.2 Software measurement and quality.

2.2.1 Software measurement concept.

2.2.2 Software quality Models.

2.3 Software reliability measurement and predictions.

2.3.1 The software reliability problem.

2.3.2 Reliability models.

2.4 Software metrics.

2.4.1 Syntactic metrics

2.5 Chapter summary.

Chapter Three

Related work

3.1 Introduction

3.2 Current Research in software metrics.

3.2.1 Complexity Metrics.

3.2.2 Measuring Complexity of web applications.

3.3 Metrics for measuring software reliability.

3.4 Data mining techniques for semantic metrics:

3.5 Semantic metrics.

3.5.1 Metrics based on entropy.

3.6 Summary of related studies.

Chapter Four

Research Methodology

4.1 Introduction

4.2 Research Strategies

4.3 Research Process and Methods

4.3.1 Define goals

4.3.2 Literature Study

4.3.3 Design Assumptions

4.3.4 Proposed Solution

4.3.5 Evaluation

4.4 Chapter Summary

Chapter Five

Software reliability mechanisms

- 5.1 Introduction
- 5.2 Fault/ Error / Failure concepts.
- 5.3 Software reliability Mechanisms
 - 5.3.1 Fault prevention.
 - 5.3.2 Fault removal.
 - 5.3.3 Fault Tolerance
 - 5.3.4 Fault / Failure Forecasting.
- 5.4 Information theory and entropy
 - 5.4.1 Information Theory
 - 5.4.2 Relational Mathematics
 - 5.4.3 Entropy
 - 5.4.4 Measuring Information Contents
- 5.5 Chapter summary.

Chapter Six

Semantic Metrics

- 6.1 Introduction
- 6.2 Fault Tolerance Methodology
- 6.3 Error detection: Redundancy
 - 6.3.1 State redundancy
 - 6.3.2 Functional redundancy
- 6.4 Error Masking: Non injectivity
- 6.5 Error Recovery: Non determinacy
- 6.6 Summary of semantic metrics
- 6.7 Chapter Summary

Chapter 7

Validation

7.1 Introduction

7.2 Empirical Research

7.2.1 Applying metrics

7.2.2 Correlation Analysis

7.2.3 Regression Results

7.3 Analytical Research

7.3.1 Estimating probability of executing faulty statements

7.3.2 Probability of sensitization

7.3.3 Probability of error propagation

7.3.4 Probability of specification violation

7.4 Results

7.5 Using failure classification Model

7.5.1 Building classification model

7.5.2 Classification result rules

7.5.3 Classification Model Limitations
