	Abstract in Arabic	IV
	Contents	
	Table of Figures	
	Table of Tables	
Chapter One		
Introduction and Literature Review		
1-1	Introduction.	1
1-2	Aim of the study.	2
1-3	The problem.	2
1-4	Literature review.	2
Chapter Two		
Basic and concept		
2-1	Photo catalysis.	5
2-1-1	Semiconductor for Photo catalysis.	5
2-1-2	Mechanism of the Photo catalytic Process.	6
2-1-3	Metal Oxides Photo catalytic Semiconductors.	8
2-2	The electromagnetic spectrum.	9
2-2-1	Wavelength and frequency.	10
2-2-2	Origin of UV-visible spectra.	11
2-2-3	Transmittance and absorbance.	11
2-2-4	Quantitative analysis.	12
2-2-5	Instrumental design.	13
Chapter three		
Experimental work		
3-1	Introduction	16
3-2	Material.	16
3-2-1	Ultraviolet/visible spectrometer instrument.	16
3-2-3	Phenol.	16
3-2-4	Zinc oxide.	18

3-3	Mouthed.	
-----	----------	--

Chapter Four		
Result and Discussion		
4-1	Introduction	20
4-2	Results and Discussion	20
4-3	Conclusion	25
4-4	Recommendations	25
	References	26

Table of Figures

Chapter Two		
Basic and concept		
2-1	Schematic of the photo catalytic mechanism for TiO_2 / ZnO photo catalysis.	7
2-2	Explain the range of electromagnetic radiation.	10
2-3	Showing how the ultraviolet/visible spectrometers work.	14
Chapter three		
Experimental work		
3-1	Shows the instrument was used in this work.	16
3-2	Shows the .Structural formula of phenol.	17
3-3	Shows the picture of phenol.	17
Chapter Four		
Result and Discussion		
4-1	Absorption spectrum of 05 % phenol in 100 ml water without photo catalysis, where absorption peak in 240nm.	20
4-2	Absorption spectra of different concentration phenol and wavelength.	21
4-3	Shows absorption spectra of phenol and concentration.	22
4-4	Absorption spectrum of 05 % phenol in 100 ml water with ZnO as a photo catalysis, where absorption peak in 288nm.	23
4-5	The absorption spectra of phenol mixed with 400 mg ZnO irradiated by LED with exposure times of: 0, 20 and 30 minutes.	24

Table of Tables

NO	Content	Page
Chapter Two Basic and concept		
2-1	Common photocatalytic semiconductors and band gap energy	9
Chapter three Experimental work		
3-1	The physical Properties of Phenol	18
