

Dedication

I dedicate this work to my parents, my brothers and sisters, my daughter and my colleagues

Acknowledgement

Deep thanks to my supervisor Professor Tagelsir Ibrahim Mohamed Idris for his help and guidance. Thanks are extended to Ustadz Elyas Mohamed Eisa for his support and sincere help. Thanks are also extended to Dr. Fakhreddin Awad Hussein, Dr. Salah Dafaalla Ahmed, Sara Adam, Umeyman Mohamed Fadlelmoula, Fatima Diab, Abeer Eltahir and my colleagues in the master program.

List of Contents

Subject	Page No.
English Abstract	1
Arabic Abstract	3
Chapter One	
Introduction	5
Objectives	6
Chapter Two	
2.1 The genus <i>Mangifera</i>	7
2.2 Origin and Distribution	7
2.3 Botany	7
2.4 Nutritional value	11
2.5 Environmental Requirements	12
2.5.1 Soil:	12
2.5.2 Climate	12
2.5.2.1 Temperature	12
2.5.2.2 Elevation	13
2.5.2.3 Light	13
2.6 Propagation	13
2.7 Seed viability	15
2.8 Rootstock	15
2.9 Mango in Sudan	16
Chapter Three	
Material and methods	17
Chapter Four	
Results	19
Chapter Five	
Discussion	28
Chapter Six	
References	30
Appendices	36

List of Tables

Table No.	Table Title	Page No.
1	The effect Argel and Haza on speed and percentage of mango seed germination	19
2	The effect of Argel and Haza water extracts on seedling height, number of leaves, leaf length and width.	21
3	The effect of Argel and Haza water extracts on number of embryos, stem diameter, root length and number of roots.	22

List of Figures

Figure No.	Figure Title	Page No.
1	Effect of Argel and Haza shoots extracts on speed and percentage of mango seed germination.	20
2	Effect of Argel and Haza water extracts treatments on seedling height	23
3	Effect of Argel and Haza shoots water extracts treatments on leaf length	23
4	Effect of Argel and Haza shoots water extracts treatments on number of leaves	24
5	Effect of Argel and Haza shoots water extracts treatments on leaf width	24
6	Effect of Argel and Haza shoots water extracts treatments on number of embryos	25
7	Effect of Argel and Haza shoots water extracts treatments on stem diameter	25
8	The effect of Argel and Haza shoots water extracts treatments on number of roots	26
9	Effect of Argel and Haza shoots water extracts treatments on root length	26
10	Effect of Argel and Haza shoots water extracts treatments on seedling height, number of leaves, leaf length and width	27
11	Effect of Argel and Haza shoots water extracts treatments on number of embryos, stem diameter, root length and number of roots	27

List of Appendices

Append. NO.	Title	Page No.
1	Table of Estimations of cultivated area and production of mango in Sudan	36
2	Plate 1. Seeds planted in plastic bags	37
3	Plate 2. Emergence of seedlings	37
4	Plate 3. Development of seedlings	38
5	Plate 4. Variation in emergence of seedlings	38
6	Plate 5. Emergence of multiple shoots from a single seedling (poly embryonic)	39
7	Plate 6. Development of multiple shoots from a single seedling (poly embryonic)	39
