

Abstract

EOR methods are used extensively nowadays for increasing ultimate oil recovery and the effectiveness of each method depends on the characteristics of the reservoir. The target of this study is to determine the optimum parameters for design surfactant concentration, and optimum injection rate.

The study started by collecting data from BB-23well which is located in main Bamboo oil field. Then the data introduced to CMG (computer modeling group) software. The study results shows that the optimum inject rate is between 150 and 100 m³/day and the surfactant concentration is 5%.

التجريد

طرق الاستخلاص المحسن تستخدم حاليا علي نطاق واسع لزيادة استخلاص النفط و كفاءة كل طريقة تعتمد علي خواص الممكن.

الهدف من هذه الدراسة هو التحديد الامثل لمتغيرات التصميم لعملية التحفيز السطحي متضمنة التركيز الكيميائي للمادة و معدل الحقن.

الدراسة بدأت بجمع البيانات من حقل بامبو وبعد ذلك تم إدخال البيانات و معالجتها باستخدام برنامج (CMG)

اخيرا تم التصميم بناء اختيار افضل تركيز ومعدل حقن و اظهرت النتائج بان افضل معدل حقن هو بين 150 و 100 متر مكعب لليوم الواحد و افضل تركيز هو 5%.

(وقل اعملوا فسيرى الله عملكم ورسوله

والمؤمنون)

صدق الله العظيم

سورة التوبة الاية (105)

Dedication

.To our prophet Mohammed peace upon him

.To our parents, brothers and sisters

.Their words of inspiration and encouragement

.In pursuit of excellence, still linger

Acknowledgment

We are glad to be your student millions thanks to you, as you gave us
the
strength to continue our work, and you become our guidance in that long
Without your help our work won't see the light. Your inspiration, direction and
funny
humor you treat us with when we make stupid mistakes, for all that and
more we
appreciate everything, and every minute you spent in reading, revising and
correcting
.our work

Thank you

Our supervisor: Fatima khalid

Some people work in the dark few people knowing them and their value.

They

are great asset and the humanity needs more of them. YOU are from them
for helping

Us and waiting for nothing as reward. Without your help

we won't be here today with this work

Thank you

Eng: muhannad khairy & Eng: hamza ahmed

**At last we want to thank: College of Petroleum
Engineering & Technology**
