DEDICATION

We dedicated this thesis to our parents, to our sisters and brothers, to all
who we love

ACKNOWLEDGMENTS

Our thanks are due to our supervisor Dr. Alaa Aldien Awouda for his valuable suggestions , support and valuable guidance without his support this thesis would not have been seen the light . Thanks to all friends and colleagues in the Sudan university of Science and Technology.Special thanks to engineer Mugahid Abd-Elrhman for hisunlimited help and support.

ABSTRACT

In this research the fuzzy logic concept is implemented in ATMEGA 16 microcontroller to control the traffic effectively and safely by including traffic congestions and emergency cases through applying load cell sensor to sense the congestion of each road and RF (Radio Frequency) for emergency cases. The ATMEGA determine the priority of each road according to the values sensed by sensors and the output signals of RF. This project is simulated, and the simulation results show that an intelligent traffic light controller has better performance and more optimal.

المستخلص

في هذا البحث تم تطبيق مفهوم المنطق الغامض باستخدام المعالج الدقيق (ATMEGA16) للتحكم في حركة السير بشكل فعال و آمن, لحل مشاكل الازدحام من خلال استخدام حساس الضغط لتحديد كثافة كل اتجاه , و دائرة تردد الراديو RF في الحالات الطارئة . يقوم المعالج الدقيق (ATMEGA16) بتحديد الأولوية لكل اتجاه تبعاً للإشارة المستقبلية من حساس الضغط و دائرة تردد الراديو. تم تنفيذ هذا المشروع من خلال برامج المحاكاة , و أثبتت النتائج كفاءة المشروع .
