NO	Item	Page
	Holy Quran Verse	I
	Dedication	II
	Acknowledgement	III
	Abstract	IV
	Arabic Abstract	V
	Chapter One-Introduction	
1.1	Prelude	1
1.2	Research Problem	1
1.3	Literature Review	1
1.4	Objectives of the Study	4
1.5	Presentation of the Thesis	4
	Chapter Two-Superconductors	
2.1	Introduction	5
2.2	Superconductors	9
2.3	Classification of Superconductors	10
2.3.1	Response to Magnetic Field	10
2.3.2	By Theory of Operation	11
2.3.4	By Material	11
2.4	Type I & Type II Superconductors	11
2.4.1	Type I Superconductor and a Periodic Chart Comparison	12
2.4.1.1	Critical Magnetic Field	13
2.4.1.2	Type II Superconductors	14
2.5	High-Temperature Superconductivity	15
2.6	Cuprates Superconductor Phases	17

2.7	Energy Gap in Superconductors as a Function of Temperature	18
2.8	Vanadium Heat Capacity	19
2.9	Exponential Heat Capacity	19
2.1	Josephson Junction	20
2.11	Josephson Voltage Standard	21
2.12	The Standard Volt	21
2.13	Cooper Pairs	22
2.14	Isotope Effect, Mercury	22
2.15	Meissner Effect	23
2.16	BSC Theory of Superconductors	25
2.17	London Moment	25
2.17.1	London Equations	26
2.17.2	Penetration Depth	28
2.17.3	Characteristic Lengths in Superconductors	30
2.17.4	London Penetration Depth in Superconductors	31
2.17.5	Coherence Length in Superconductors	32
2.18	Conventional Theories	32
Chapter Three-Properties of Superconductors		
3.1	Introduction	34
3.2	Zero Electrical DC Resistance	34
3.3	Superconducting Phase Transition	37
3.4	Persistent Currents Lead to Constant Magnetic Flux	39
3.5	The Messier Effect	43
3.6	Thermal Properties of Superconductor	45
3.7	Transition Temperatures	47
3.8	Specific Heat and Thermal Conductivity	48
3.9	Energy Gap	49

3.1	Magnetic & Electromagnetic Properties of Superconductors	50
3.10.1	Critical Field	50
3.10.2	High-frequency Electromagnetic Properties	51
3.10.3	Magnetic-Flux Quantization	51
3.10.4	Josephson Currents	52
	Chapter Four- Technological Applications of Superconductivity	
4.1	Introduction	54
4.2	Uses for Superconductors	55
4.2.1	A Summary for Superconductor Applications	64
4.2.1.1	Superconducting Magnets	64
4.2.1.2	Superconducting Transmission Lines	65
4.2.1.3	Superconducting Maglev Trains	65
4.2.1.4	Fault-Current Limiters	66
4.2.1.5	Superconductors in NMR Imaging	66
4.2.1.6	SQUID Magnetometer	66
4.2.1.7	Superconduction Motors	67
	Chapter Five-Conclusion & Recommendations	
5.1	Discussion	69
5.2	Conclusion	70
5.3	Recommendation	70
	References	72
