

List of contents

	الآية	I
	Dedication	II
	Acknowledgement	III
	Content	IV
	List of Table	VIII
	List of Figure	IX
	Abbreviation	X
	Abstract	XII
	المستخلص	XIII
1.1	Chapter one: Introduction	
1.2	Nuclear medicine	1
1.3	Radiation protection	1
1.4	Problem of study	5
1.4.1	Objective	5
1.4.1	General objective	5
1.5	Specific objective	5
2	Thesis Outline	5
2.1	Chapter two: Literature view	5
12.1.1	Classification of radiation	
2.1.1.1	Classification of ionizing radiation	
2.2	Classification of indirectly ionizing photon radiation	8
2.2.1	Radioactivity	9
2.2.2	The half-life (T _{1/2})	9
2.2.2.1	Modes of radioactive decay	9
2.2.2.2	Alpha (α) Particle Decay	9
2.3	Beta (β) Particle Decay	10
2.3.1	Radiation units	10
2.3.2	Gray	10

2.3.3	Rad	11
2.3.4	The coulomb per kilogram (C/kg)	11
2.3.5	Roentgen (R)	11
2.4	Sievert (Sv)	11
2.4.1	radiation quantities	11
2.4.2	Exposure	11
2.4.3	Absorbed dose	11
2.4.5	Equivalent dose	12
2.5	Effective dose	12
2.6	Collective dose	12
2.6.1	Physical and Biologic Factors	12
2.6.1.1	radiation protection	13
2.6.1.2	Categories of exposure	13
2.6.1.3	Occupational exposure	13
2.6.2	Public exposure	14
2.6.2.1	Medical exposure of patients	14
2.6.2.2	Radiation protection quantities	15
2.6.2.3	Mean organ or tissue dose	15
2.6.2.4	Committed dose	16
2.6.2.5	Operational quantities	16
2.6.2.6	Ambient dose equivalent	16
2.6.2.7	Directional dose equivalent	16
2.6.3	Personal dose equivalent	17
2.7	Rationale for radiation protection	17
2.7.1	Monitoring of personal	18
2.7.1.1	Type of personal dosimeters	18
2.7.1.2	Film B adge	18
2.7.1.3	Thermoluminescent	19
2.7.1.4	Optical stimulated luminescence(OSL) dosimeters	19
2.8	Pocket dosimeters	20

2.8.1	Principle of radioactive iodine -131 therapy	21
2.8.2	Characteristic of iodine -131	22
2.8.3	Mechanism of iodine -131 therapy	22
2.8.3.1	Radiation protection in iodine -131 therapy	23
2.8.3.1.1	Radiation exposure	23
2.8.3.1.2	Time	23
2.8.3.1.3	Distance	23
2.8.3.2	Shielding	23
2.8.4	Evaluation of exposure to the personal	24
2.8.4.1	Radioactive iodine contamination	24
2.8.4.2	Important source of radioactive iodine contamination	24
2.9	Preparation for an iodine -131 treatment programme	25
	Previous study	26
3.1	Chapter three , Material and Method	
3.1.1	Material	32
3.1.2	Pocket dosimeter	32
3.1.3	Survey meter	33
3.1.4	Barrier	33
3.1.5	Isolated room	34
3.1.6	Staff	34
3.2	Samples	35
3.2.1	Method	36
3.2.2	Technique	36
	Procedures	36
	Chapter four : results	37
	Chapter five : Discussion, Conclusion and Recommendation	41
