

Dedication

I dedicate this research to:

My supervisor Prof. Yousif Fadlalla

My mother

My father

My husband

Acknowledgments

First of all I Would like to thank ALMIGTY ALLAH for giving me patience and help to complete this Work

It would not have been possible to write this thesis without and support of the kind people around me, to only some of Whom it ispossible to give particular mention here.

Above all, I would like to gratefully and sincerely thank prof :Yousif Fadlalla for his guidance, understanding, patience and encouragementthrough all the study.

Furthermore, I would like to thank my friends working in the laboratory in Hilalya Teaching hospital and laboratory research in Sudan University for their information, assistance during collection of samples and technical support.

Abstract

This cross-sectional, analytical study was conducted in Hilalya ,Sudan ,during the period from April to July 2017. Ninetybloodsamples were collected from ninety participants of different ages and sex to detect syphilis among population of Hilalya state .

All serum samples were examined by using two screening nonspecific serological tests ICT rapid test and Rapid Plasma Reagin test (RPR) .All specimens were assayed further by using Enzyme Linked Immunosorbant assay (ELISA) .

All samples gave negative result by using RPR test and ICT rapid test and 6(6.6 %) of sample were positive by using ELISA technique (specific treponemal antibodies were detected).

No one of positive cases have genital ulcers or any syphilis symptom recently ,but 5(83.3%) of them suffered of genital ulcer previously .

In this study 50% of the participants were males and the other 50% were females.

Positive cases were 2 males and 4 females . The positive cases were count in the age ranges 46 -60 (1) , 61 -75 (2) and other 3 positive cases were in the age 67 - 90 years old.

ملخص الاطروحة

في هذه الدراسة تم جمع تسعين عينة دم من سكان منطقة الهلالية في اعمار مختلفة بغرض معرفة الانتشار المصلبي لمرض الزهري في المنطقة .

المشاركون في هذه الدراسة 50% منهم من الذكور 50% من الإناث .

تم هذا العمل في مستشفى الهلالية التعليمي وذلك في الفترة من مايو وحتى اغسطس 2017 جميع هذه العينات تم اختبارها بثلاثة اختبارات مختلفة ، اولها الكشف عن الاجسام المضادة بطريقة الكشف المناعي السريع وثانيا باستخدام اختبار البلازما السريع وثالثا باستخدام فحص الانزيم المناعي المرتبط . كل العينات اعطت نتائج سالبة باستعمال الفحص المناعي السريع وايضا كل العينات اعطت نتائج سالبة باستخدام اختبار البلازما السريع و 6.6% من العينات اعطت نتائج موجبة باستخدام فحص الانزيم المناعي المرتبط .

الحالات الإيجابية كانت من ضمن الفئه العمرية 46-60 و 61-75 و 76-90 وولا يوجد حالات من القرح التناسليه في الحالات الإيجابية .

اربعة من الحالات الإيجابية كانوا من الاناث واثنان من الذكور.

CHAPTER ONE INTRODUCTION

1.1 Introduction.....	1
1.1.1 Rationale.....	3
1.2 Objectives.....	3
1.2.1 General objective.....	3
1.2.2 Specific objectives.....	3

CHAPTER LITERATURE REVIEW

2.1 History of syphilis.....	4
2.2 Causative organisms.....	4
2.2.1 Characteristics of Treponem palladium.....	4
2.2.2 Cultural characteristics.....	4
2.2.3 Metabolism.....	5
2.2.4 Genome.....	5
2.2.5 Periplasmic flagella and motility.....	5
2.3 Transmission.....	6
2.4 Epidemiology of syphilis.....	6
2.5 Pathogenesis of syphilis.....	7
2.6 Classification of syphilis.....	7
2.6.1 Acquired syphilis	8
2.6.1.1 primary syphilis.....	8
2.6.1.2 Secondary syphilis	8

2.6.1 .3 Latent syphilis.....	9
2.6.1.4 Tertiary syphilis.....	9
2.6.2 Congenital Syphilis.....	9
2.6.2.1 Early Congenital Syphilis.....	9
2.6.2.2 Late congenital syphilis.....	10
2.7 Laboratory diagnosis.....	10
2.7.1 Microscopy.....	10
2.7.2 Serolgical tests.....	11
2.7.2.1 Non-treponemal tests.....	11
2.7.2.2 Treponemal tests.....	12
2.7.2.3 Immunochromatographic based strips (ICT)	12
2.7.3 Molecular methods	12
2.8 Treatment	12
2.9 Prevention.....	13

CHAPTER THREE MATERIALS AND METHODS

3.1 Study design.....	15
3.2 Study population.....	15
3.3 Study area.....	15
3.4 Ethical consideration.....	15
3.5 Inclusion criteria.....	15
3.6 Exclusion criteria.....	15
3.7 Sample size.....	15
3.8 Data collection.....	15
3.9 specimens collection ,preparation and storage.....	15
3.10 Laboratory Examination.....	16
3.10.1 Rapid plasma Regain (RPR)	16
3.10.1.1 Reagents.....	16
3.10.1.2 Procedure	16
3.10.2 Immunochromatographic based strip test (ICT)	16
3.10.2.1 procedure.....	16
3.10.2.2 Interpretation of assay result.....	17
3.10.3 Enzyme linked Immunosorbent assay.....	17
3.10.3.1. Procedure	18
3.10.3.2 Interpretation of Result	19

CHAPTER FOUR RESULTS

4. Results.....	21
