

**Sudan University of Science and
Technology
College of Post graduate Studies and
Scientific Research**

**Evaluation of the Effectiveness of
Low Power Diode Laser with different
wavelengths in Dental caries
Prevention
(In Vitro Study)**

**تقييم أثر ليزرات الثنائي واطئة القدرة
بأطوال موجية مختلفة فى الوقاية من
تسوس الأسنان
(دراسة مختبرية)**

A thesis submitted as fulfillment for the requirement
of the Philosophy Degree in laser applications in
dentistry

**By: Elhadi MohiEldin M. Awooda
Supervisor: prof.Dr. Nafie A. Almuslet
Co-supervisor: Dr. Ibrahim Elkamil Abdalrahim**

Acknowledgment I
Abstract English.....1II
Abstract
Arabic.....V1
List of tables
V111
List of figures.....
1X
Chapter one: Introduction and basic concepts
1.1 Introduction
.....1

1.2	Dental caries	4
1.3	Etiology of dental caries.....	6
1.4	Microbiology of dental caries.....	7
1.5	Caries of the enamel.....	8
1-5-1	Macroscopic changes of enamel.....	8
1-5-2	Microscopic changes of enamel.....	9
1-5-3	Ultrastructure changes in enamel	9
1-5-4	Role of diet in dental caries.....	9
1-5-5	Role of the host.....	11
1-5-6	Role of saliva.....	11
1-5-7	Tooth factor.....	12
1-5-8	Time factor	12
1-5-9	Genetic factor.....	12

1-6 Epidemiology of dental caries.....	13
1-7 Fundamentals of laser	13
1-7-1 Laser device.....	14
1-7-2 Principle of laser operation.....	15
1-7-3 Modes of laser operation	16
1-7-4 Properties of laser light	17
1-7-4-1 Monochromaticity.....	17
1-7-4-2 Coherence.....	17
1-7-4-3 Directionality.....	17
1-7-5 Laser high intensity delivery system.....	18
1-8 Laser tissue interaction	18
1-8-1 Wavelength dependent regime.....	19
1-8-1-1 Photothermal interaction.....	19
1-8-1-2 Photochemical Interaction.....	21
1-8-2 Wavelength independent regime.....	22
1-9 Laser interaction with enamel and dentin.....	23
1-10 Uses of lasers in dentistry.....	25
1-11 Uses of diode lasers in dentistry.....	26
1-12 Laser hazard classification and safety precautions.....	28

1-13 Safety precaution when handling laser equipment.....
.....30

1-13-1 Beam non related hazardous.....
.....30

1-13-2 Beam related hazardous.....
.....30

Chapter two: Conventional and laser in prevention of dental caries

2-1 Introduction
.....32

2-2 Prevention of dental caries
.....32

2-3 Historical efforts in prevention of dental caries.....33

2-4 Uses of fissure sealants and fluoride in caries prevention.....34

2-5 Laser for caries prevention.....37

2-5-1 Suggested mechanism of laser irradiation for caries prevention.....38

2-5-2 Literatures review.....
.....39

2-5-2-1 CO₂ , Ar⁺, Er:YAG , Nd :YAG , Er:YSGG laser for caries prevention.....
.39

2-5-2-2 Diode laser for caries prevention.....
.....47

2-6 The aims of the study.....
.....51

Chapter three: Materials and Methods

3-1 Introduction.....
.....53

3-2 The materials.....
.....53

3-2-1 Extracted human premolar teeth.....
.....53

3-2-2: Lactic acid.....
....54

3-2-3: Deionized water.....	55
3-2-4: Nail varnish	55
3-2-5: Sterile collecting glass tubes	55
3-2 The equipments.....	55
3-4 The methods.....	56
3-4-1 Investigation of artificial caries like lesion using polarized light microscope	57
3-4-1-1 Preparation of teeth.....	57
3-4-1-2 Preparation of diode lasers.....	58
3-4-1-3 Preparation of samples for examination.....	59
3-4-1-4 Caries depth measurement and calculation	60
3-4-2 Methods of study the calcium dissolution.....	60
3-4-2-1 Preparation of teeth.....	60
3-4-2-2 Grouping and irradiation by 532 nm and 671 nm diode lasers....	62
3-5 laser safety measures	6
3-6 data analysis.....	65
Chapter four: Results and discussion:	
4-1 Introduction	66
4-2 Results of study using polarized light microscope	66

4-3 Study of calcium solubility using diode lasers 532 nm and 671nm.....	70
4-3-1 Calcium solubility using diode laser 532 nm.....	70
4-3-2 Results of calcium dissolution using diode laser 671 nm.....	73
4-3-3 Comparison between groups irradiated by 532 nm and 671 nm.....	75
4-4 Discussion.....	77
4-4-1 Caries prevention and justification for using low power diode laser.....	77
4-4-2 Suggested mechanism for caries prevention by low power lasers.....	80
4-4-3 Effect of diode laser wavelength in reducing acid solubility	81
4-4-4 Laser irradiation time as a factor in caries prevention process.....	83
4-5 Conclusions.....	84
4-6 Recommendation.....	85
References.....	86
