List of Figures

Figure	Title	page
2.1	Irrigation System and Water Lifting using Wind Mill Energy	4
2.2	Automatic drip irrigation system using wind energy	4
2.3	Intelligent microcontroller-based irrigation system with sensors	5
2.4	Microcontroller based Automatic Water level Control System	6
2.5	Tip speed ratio Vs rotor efficiency	8
2.6	Squirrel cage rotor of the induction machine under rotating magnetic field	11
2.7	Vertical Axis Wind Turbines	13
2.8	horizontal axis wind turbines	14
2.9	wind resource in Sudan	15
3.1	Block Diagram of the main components	18
3.2	Pin out of ATmega32	20
3.3	The VH400 Moisture Sensor	21
3.4	Lm35 temperature sensor	22
3.5	Xkc-y25 level sensor	23
3.6	Xkc-y25 level sensor	24
3.7	16*2 LCD	25

3.8	YM1240-30 deep well pump	26
3.9	Bencotek OR-01 Induction Motor	26
3.10	Water Valve	27
3.11	G6C relay	28
3.12	Bridge rectifier	29
3.13	ULN 2803 driver	29
4.1	Flow Chart of proposed system	31
4.2	simulation model of water lifting and irrigation system	32
4.3	Determine wind speed and power	33
4.4	Turn on the Pump when the tank is empty	34
4.5	turn off the pump when the tank is full	35
4.6	The valve open depending on the temperature and VWC values	35
4.7	The Valve is closed	36
