

CONTENTS

- i. **Dedication**
- ii. **Acknowledgment**
- iii. **Abstracts (English)**
- iv. **Abstracts (Arabic)**

	Chapter 1	Page
	Research plan	
1-1	Introduction	1
1-2	Statement of the problem	2
1-3	Research problem	5
1-4	Research questions	5
1-5	Purposes of the study	6
1-6	The importance of the study	6
1-7	Hypotheses	7
1-8	Definition of terms	
	Chapter 2	Page
	Literature Review	
2-1	Technology development	10
2-2	Source of new technology	10
2-3	Appropriate technology	11
2-4	Technology transfer	12
2-5	Adoption process	14
2-6	Two ways of development	15
2-7	The new trend: Target group partition	16
2-8	Mechanized farming	16
2-9	Extension unit (Damazin)	17
2-10	Sesame:(Ecology and structure)	17
2-11	Sesame Uses and Economic:	17
2-12	Production Areas in Sudan	18
2-13	Objectives of the agricultural research corporation program	18

2-14	Reviewing of the recommended cultural practices for crop sesame	19
	Chapter 3	Page
	Methods and procedures	
3-1	The place of the study	22
3-2	Population and sample selection	22
3-3	Data collection	23
3-4	Sources of the data	23
3-5	Data analysis	24
	Chapter 4	Page
	Finding and Discussion	Num
	I-personal characteristics analysis	ber
4-1	Distribution of respondents by age	25
4-2	Distribution of respondents by marital status	26
4-3	Distribution of respondents by Level of education	26
4-4	Distribution of respondents by family size	27
	II-Economic characteristics analysis	28
4-5	Distribution of respondents by occupation	28
4-6	Distribution of respondents by income	28
	III Agricultural labors renting and cost analysis	29
4-7	Distribution of respondents by rabours renting	29
4-8	Distribution of respondents by labors cost	29
4-9	Distribution of respondents by knowledge of type of cultivars	30
4-10	Distribution of respondents by extent of using improved seeds	30
4-11	Distribution of respondents by source of improved seeds	31
4-12	Distribution of respondents by way of preparing	31

	land	
4-13	Distribution of respondents by belief in recommended land preparation (attitude)	32
4-14	Distribution of respondents by Level of knowledge of recommended land preparation	32
4-15	Distribution of respondents by recommended crop sequence Knowledge	33
4-16	Distribution of respondents by extent of using improved seeds practicing Recommended crop sequence	33
4-17	Distribution of respondents by extent of using improved seeds area cultivated with sesame	33
4-18	Distribution of respondents by extent of using improved seeds suitability of recommended crop rotation	34
4-19	Level of knowledge of the recommended sowing date level of knowledge of the recommended sowing date	34
4-20	Distribution of respondents by belief that sowing in the recommended sowing day increase the yield	35
4-21	Distribution of respondents by extent of using improved seeds sowing date	35
4-22	Level of knowledge of the recommended sowing date reasons of late sowing	36
4-23	Level of knowledge of the recommended sowing date recommended seed rate knowledge	36
4-24	Level of knowledge of the recommended sowing date practicing of Recommended seed	37

	rate	
4-25	Level of knowledge of the recommended sowing date distribution of recommended seed rate adequacy	37
4-26	Level of knowledge of the recommended sowing date distribution of recommended sowing method practice	38
4-27	Level of knowledge of the recommended sowing date distribution of recommended sowing method knowledge	38
4-28	Level of knowledge of the recommended sowing date distribution of belief recommended sowing method increase the yield	39
4-29	Level of knowledge of the recommended sowing date distribution of respondents by fertilization	39
	Chapter 5	
5-1	Summery of the results	40
5-2	Conclusion	43
5-3	Recommendation	43
	References	45
	Appendix	

List of tables & Figures

		Page
Table 1	Frequency distribution of respondents by age	25
Table 2	Frequency distribution of respondents by marital status	26
Table 3	Frequency distribution of respondents by level of education	26
Table 4	Frequency distribution of respondents by for family size	27
Table 5	Frequency distribution of respondents by occupation	27
Table 6	Frequency distribution of respondents by income	28
Table 7	Frequency distribution of respondents by agricultural labors renting	28
Table 8	Frequency distribution of respondents by cost of labors	29
Table 9	Frequency distribution of respondents by extent of improved seeds using	29
Table 10	(Frequency distribution of respondents by improved seeds (attitude	30
Table 11	Frequency distribution of respondents by type of cultivars	30
Table 12	Frequency distribution of respondents by the way of preparing land	31
Table 13	Frequency distribution of respondents by belief of the recommended (land preparation(RLP	31
Table 14	(Frequency distribution of respondents by knowledge of(RLP	32
Table 15	Frequency distribution of respondents by recommended crop sequence (RCS) knowledge	32
Table 16	Frequency distribution of respondents by practicing	32
Table 17	Frequency distribution of respondents by total sesame area	33
Table 18	(Frequency distribution of respondents by suitability of (RCS	33
Table 19	Frequency distribution of respondents by the recommended sowing date knowledge	34
Table 20	Frequency distribution of respondents by belief sowing date increase yield	34
Table 21	Frequency distribution of respondents by sowing date	35
Table 22	Frequency distribution of respondents by the reason of sowing late	35
Table 23	Frequency distribution of respondents by recommended sowing date knowledge	36
Table 24	Frequency distribution of respondents by recommended sowing date practicing	36

Table 25	Frequency distribution of respondents by 1.5 Kg /Fed abundance	36
Table 26	Frequency distribution of respondents by the recommended sowing method (RSM) practicing	37
Table 27	(Frequency distribution of respondents by knowledge of(RSM	37
Table 28	Frequency distribution of respondents by belief sowing by (RSM) .increase the yield	38
Table 29	Frequency distribution of respondents by fertilization	38
