

Acknowledgement

I would like to express my sincere thanks and gratitude to the followings
without order

My **family** for their patience and tolerance during my lengthy absence
.home collecting materials and studying

My **brothers** and **friends** for their moral support and encouragement
especially at the depressive moment when I thought this study will not
.going to finish

My **supervisor** whom I greatly indebt for his unlimited time allowed for
.study correcting critizing and producing the final version
.Finally to all those who support the study in way or another

TABLE OF CONTENTS

Content	Page No
LIST OF FIGURE	V
LIST OF TABLE	VII
ABSTRACT	X
تلخيص	XII
CHAPTER ONE : INTRODUCTION	1
1.1 Introduction	2
CHAPTER TWO : LITERATURE REVIEW	4
2.1 Introduction	5
2.1.1 History of Oil Exploration	5
2.1.2 Infrastructure in Sudan	7
2.2 EOR Methods	14
2.2.1 Background	14
2.2.2 Chemical Processes	18
2.2.3 Polymer Flooding	19
2.2.4 Alkaline Polymer Water Flooding	20
2.2.5 Alkaline / Surfactant Flooding	20
2.2.6 Gas Injection Processes	22
2.2.7 Thermal Processes	24
2.2.7.1 Overview	24
2.2.7.2 Steam Flooding	25
2.2.7.3 (Steam Assisted Gravity Drainage (SAGD	27
2.2.8 Other EOR Methods	31
2.2.8.1 Foamy heavy Oil Production	31
2.2.8.2 Microbial Flooding	32
CHAPTER THREE : MEHODLOGY OF STUDY	34
3.1 Introduction	35
CHAPTER FOUR : RESULTS AND DISCUSSION	39
4.1 Block (3,7) Petrodar Operation Company	40
4.1.1 EOR Opportunities	40
4.1.2 Petrodar Status Progress	54
4.1.2.1 Palogue and Gassab EOR Fields Studies	54
4.1.2.2 Mooz EOR Screening Field Studies	62
4.2 (Greater Nile Petroleum Operation (GNPOC	72
4.2.1 EOR Opportunities	72
4.3 (Petro –Energy Group Block -6 (P-E	101
4.3.1 EOR Opportunities	101
4.3.2 Application	108
4.3.2.1 Cycle Steam Stimulation	108
4.3.3 Conclusion and Recommendation	112
4.4 (White Nile Petroleum Company (Block 5A	113
4.4.1 EOR Opportunities	113
4.4.2 Status of EOR Project in WNPOC	117
4.4.2.1 Tharjath ROR Project	117

CHAPTER FIVE : CONCLUSION AND RECOMMENDATIONS	119
References	122
Abbreviation	130

LIST OF FIGURES

FIGURES No		Page No
FIG 2.1.1	Showing The Infrastructure in Sudan	8
FIG 2.1.2	Showing Sudan Hydrocarbon Concessions	9
FIG 2.1.3	Showing Production forecast for Sudanese fields	10
FIG 2.1.4	Showing Average RF for Sudanese fields	11
FIG 2.1.5	The location of EOR projects around The world	12
FIG 2.2 .1	Schematic Diagram of Displacement and sweep Efficiency concept	14
FIG 2.2.2	Oil Recovery mechanisms	16
FIG 2.2.3	Showing EOR used in tertiary Recovery	16
FIG 2.2.4	Shows Chemical(Polymer Flooding)	19
FIG 2.2.5	Typical Flood Design in Polymer Flooding	20
FIG 2.2.6	Typical surfactant/polymer injection flooding pattern	21
FIG 2.2.7	Gas flooding Application using Co2	23
FIG 2.2.8	Gas flooding Application using N2	24
FIG 2.2.9	Huff and puff steam injection Technique	25
FIG 2.2.10	Illustrates The application of steam Technique	26
FIG 2.2.11	Steam Assisted Gravity Drainage	28
FIG 2.2.12	In-situ combustion process for Thermal EOR	29

FIG 2.2.13	Microbial Enhanced oil Recovering (MEOR)	32
FIG 3.1	Depth limitation for Enhanced oil Recovery	36
FIG 3.2	Permeability Guides for Enhanced oil Recovery Methods	36
FIG 3.3	Preferred Oil Viscosity Ranges for Enhanced oil Recovery Methods	37
FIG 4.1.1	The depth structure map of melut Basin	40
FIG 4.1.2.1	Showing the project scope	55
FIG 4.1.2.2	Oil Gravity Vs EOR methods(Steam)	56
FIG 4.1.2.3	Oil Gravity Vs EOR methods(Steam)	57
FIG 4.1.2.4	Oil Gravitas Vs EOR method (In-situ combustion)	58
FIG 4.1.2.5	Oil Gravitas Vs EOR method (immiscible. Gas)	59
FIG 4.1.2.6	Hamal NW structure map	62
FIG 4.1.2.7	Mooz structure map	62
