Abstract

Many institutions managed to established institutional forest, namely, Elrahad irrigated scheme, Kenana for sugar company (K.S.C), Assalya and Sennar. Ever for these institutions after assement study were carried out to explain the socio-economic-aspects of those plantations. The broad objective of this study is to explore and highlight the role of forest plantations in local people employment and investigate the benefits and services which is gained from the project.

Tow types of methods were to collect the necessary information, namely, primary and secondary data. The primary data was collected through, self interview, and self administered questionnaire with local people and administrators respectively, and secondary data was collected through records, field reports and related references.

خلاصة البحث

الأثر الاقتصادي - الاجتماعي لغابات البان في مشروع سكر كنانة

عدة مؤسسات سودانية قامت بإنشاء غابات المؤسسات وهي مشروع كنانة ومشروع الرهد المروي وعسلاية وسنار حتى في هاتين المؤسستين يوجد شح نسبي لتحليل وتقييم الفوائد الاقتصادية والاجتماعية في المنطقة .

الهدف العريض من الدراسة توضيح وإلقاء الضوء على الفوائد الاقتصادية والاجتماعية المتمثلة في خلق عمالة وأيضاً الخدمات والمنافع التي يتحصل عليها المواطن داخل وخارج مشروع كنانة من غابات المشروع .

تم جمع نوعين من المعلومات هي المعلومات الأولية والثانوية . جمعت المعلومات الأولية من خلال المقابلات واستبيان الإداريين والسكان المحليين والعمال . أما المعلومات الثانوية فقد تم جمعها من الكتب والتقارير والبحوث .

كانت أهم النتائج من الدراسة إن مشروع الغابات في كنانة له مساهمة واضحة في خلق فرص للعمل وتحسين دخول المواطنين العاملين وتقديم خدمات ومنافع لهم مثل حطب الحريق ، أعمدة المباني والمراعي والخدمات الاجتماعية الأخرى . ويواجه مشروع الغابات في كنانة ضيق المساحات وندرة مياه الري والعمالة وهي المكونات الأساسية لنجاح أي مشروع .
