LIST OF TABLES	vii
LIST OF APPENDICES	viii
ACKNOWLEDGEMENTS	ix
ABSTRACT	x
Arabic ABSTRACT	xii
<b>Introduction</b>	1
<b>Chapter one</b>	3
<b>Literature Review</b>	
1.0 Energy	3
1.1 Energy utilization	3
1.2 Lipids	4
1.2.1 Definition of Lipids	4
1.2.2 Classification of lipids	4
1.3 Source of lipids	6
1.3.1 Animal fat	6
1.3.2 Vegetable fat or oil	6
1.4 Type of fatty acids	6
1.4.1 Saturated fatty acids	7
1.4.2 Unsaturated fatty acids	7
1.5 Essential fatty acids	7
1.6 Quality of lipids	8
1.7 Nutritive value of lipids for broiler	9
1.7.1 Nutritive value of beef tallow	12

1.7.2	Nutritive value of cotton seed oil	13
1.8	Digestion and absorption of lipids	14
1.9	Factors affecting utilization of lipids	15
1.10	The effect of dietary lipids on broiler performance	18
1.10.1	Feed intake	18
1.10.2	Body weight gain	20
1.10.3	Feed conversion	21
1.11	The effect of dietary lipids on body and carcass composition	22
1.12	The effect of dietary lipids on serum cholesterol level	23
	<b>Chapter two</b>	<b>25</b>
	<b>Materials and Methods</b>	
2.1	Experimental chicks	25
2.2	Housing	26
2.3	Experimental diets	26
2.4	Experimental procedure	29
2.5	Slaughter procedure	29
2.6	Proximate analysis	29
2.7	Preparation of serum	30
2.8	Serum cholesterol determination	30
2.9	Determination of using total lean, sample is prepared for cholesterol	31
2.10	Statistical analysis	31
	<b>Chapter Three</b>	<b>32</b>
	<b>Results</b>	
3.1	The effect of dietary lipids on broiler chicks performance	32
3.2	The effect of dietary lipids on cold and hot dressing percentage of broiler chicks	33

3.3	The effect of dietary lipids on chemical composition of total lean for broiler chicks	33
3.4	The effect of dietary lipids on serum and tissues cholesterol	34
3.5	Feeding economics of the experimental groups	35
	<b>Chapter four</b>	<b>37</b>
	<b>Discussion</b>	
4.1	Conclusion	41
4.2	Practical implications	41
4.3	Suggestion for future work	42
	<b>References</b>	<b>43</b>
