

ABSTRACT

A prospective study was conducted during the period 2001 to 2003 at Omdurman maternity, Khartoum teaching and Khartoum North teaching hospitals.

One hundred and twenty Sudanese pregnant women at different stages of pregnancy were chosen for this study. Forty non-pregnant women of the same age without endocrine disease were chosen as control. Thyroid hormones total (T_4 and T_3) and free (FT_4 and FT_3) were measured. In addition TSH, hCG and TG were also measured in both groups.

The Study group were divided according to the gestational age (weeks) into three subgroups: - First trimester 5 – 12 weeks, second trimester 13 – 27 weeks and third trimester 28 – 40 weeks. Determination of serum hormones concentration was carried out using a highly sensitive specific RIA technique.

The results of this study showed that there was an increase in concentration of total thyroid hormones (T_4 and T_3), but the increase did not proceed at steady level during the different trimesters both hormones increase significantly in all trimesters compared with control group and continued thereafter, but at slower rate.

Mean serum free T_4 increase significantly during the first trimester, while the increase in T_3 concentration was not significantly different compared to non-pregnant women. Free T_4 and free T_3 decreased significantly during second and third trimesters of pregnancy compared with non-pregnant women.

Thyroid stimulating hormones (TSH) level remained within the normal range throughout pregnancy period although pregnant women had suppressed

Below normal range in the first trimester(12.5%).

The concentration of human chorionic gonadotrophin hCG increased highly significantly in the first trimester, but decreased sharply in the second and third trimesters. Thyroglobulin increased in all three trimesters of pregnancy compared to control group, however the greatest elevation was detected during the first trimester.

The results of this study showed that the increase of hCG in the first trimester has stimulating effect on thyroid gland, although TSH remains within the normal range, this indicated that the increase of free thyroxine hormone concentration during pregnancy may be due to the increase in hCG only this indicated that the changes of thyroid hormones during pregnancy were physiological resulted from The pituitary gland has no stimulating effect on thyroid gland during normal pregnancy.

بسم الله الرحمن الرحيم

الخلاصة

اجريت هذه الدراسة في الفترة من 2001 حتى 2003 حيث كان مكان الدراسة في مستشفى (الولادة امدرمان، الخرطوم التعليمي وبحري التعليمي) في هذه الدراسة تم الحصول على عينات مصل فردية من مائة وعشرون امرأة سودانية حامل في مختلف فترات الحمل واربعون حالة غير حامل كتحكم في نفس العمر وغير مصابات باى من امراض الغدد الصماء ، لدى هؤلاء النساء تم قياس هرمونات الغدة الدرقية الكلية "الثيروكسين والثيروكسين ثلاثي اليود" وكذلك الهرمونات الحرة "الثيروكسين الحر والثيروكسين ثلاثي اليود الحر" كما تم ايضا قياس الهرمون المحفز للغدة الدرقية وهرمون الحمل والثيروقلوبولين اثناء فترة الحمل والتي تم تقسيمها الى ثلاثة فترات اعتمادا على مدة الحمل والبالغة اربعون أسبوعا كما يلى الفترة الاولى (5 - 12 اسبوعا)الفترة الثانية (13 - 27 اسبوعا) و الفترة الثالثة (28 - 40 اسبوعا). عدد العينات في كل طور بلغ اربعين عينة ولقياس هذه الهرمونات تم استخدام الطريقة العالية الحساسية والعالية الدقة وهي طريقة المقايسة المناعية الاشعاعية . اظهرت هذه الدراسة ان مستويات هرمونات الغدة الدرقية الكلية (الثيروكسين والثيروكسين ثلاثي اليود) تزداد خلال الحمل بصورة غير منتظمة ، الثيروكسين الكلى والثيروكسين ثلاثي اليود الكلى ارتفعا بصورة ذات دلالة احصائية مقارنة بالنساء غير الحوامل واستمر الارتفاع بصورة بطئية حتى نهاية الحمل.

متوسط هرمونات الغدة الدرقية الحرة (الثيروكسين الحر والثيروكسين ثلاثي اليود الحر) ارتفعا فقط في الفترة الاول مقارنة بالنساء غير الحوامل والنساء في كل من الفترتين الثانية والثالثة، ارتفاع الثيروكسين الحر كان ذا دلالة احصائية بينما لم يكن ارتفاع

الثيروكسين ثلاثي اليود الحر ذات دلالة احصائية مقارنة بالنساء غير الحوامل .

خلال الفترتين الثانية والثالثة من الحمل مستوى الهرمونات الحرة قد انخفض كثيرا بصورة ذات دلالة احصائية مقارنة بالنساء غير الحوامل والنساء في الفترة الاولى ولكن بشكل متدرج اما الهرمون المحفز للغدة الدرقية فقد ظل في مستواه الطبيعي في كل فترات الحمل الثلاثة الا انه انخفض في حوالي 12.5% من جملة الحالات في الفترة الاولى من الحمل، بينما ارتفع هرمون الحمل بصورة كبيرة خلال الفترة الاولى ثم انخفض بشكل حاد في الفترتين الثانية والثالثة على الترتيب. اما الثيروقلوبيلين ارتفع في كل فترات الحمل مقارنة مع النساء غير الحوامل رغم انه ارتفاعه كان ذات دلالة احصائية في الفترة الاولى فقط .

خلصت الدراسة الى ان ارتفاع هرمون الحمل والذي وجد فقط اثناء الفترة الاولى من الحمل له تأثير محفز لهرمونات الغدة الدرقية اثناء الحمل مع وجود مستوى طبيعي للهرمون المحفز للغدة الدرقية مما يدل على ان التغير في هرمونات الدرقية هي تغيرات فسيولوجية وناتجة عن عدم تأثير الغدة النخامية على تحفيز افراز هرمونات الغدة الدرقية اثناء الحمل .

ACKNOWLEDGEMENTS

I am greatly indebted to my supervisor **Dr. Khalda M. Hamza** Head department of science laboratory Technology without her this work would have not been possible and her great help to finish this work.

Thanks are also due to my co-supervisor **prof. Abdallah Hassan Bashir** head department of Biochemistry, Faculty of Medicine – Omdurman Islamic University for his great help and guidance and who has given me much of his time for suggestion and supervision.

Thanks are also to my colleagues:

- **Mr. Nagi Ibrahim Ali**, who always help me during the work.
- **Mr. Abdelmonem Mohamed Hassan**, head department of RIA lab in Sudan Atomic Energy Commission for his help and guidance.
- **Mr. Waleed A.Bagi Ahmed**, for his help during the statistical analysis.
- Especially thanks to **Mr. Abdallah Abdelmalik Abdallah**, for his kind help in typing the thesis.
- Many thanks are extended to all the staff of Maternity Hospitals of Omdurman and Khartoum North and Khartoum teaching hospital and the staff of RIA of Sudan Atomic Energy Commission.

Chapter one: INTRODUCTION AND LTERATURE REVIEW

1.1 General Introduction	1
1.2 Literature review	3
1.2.1 Thyroid gland structure.....	3
1.2.2 Histology of thyroid gland	3
1.2.3 Thyroid hormones Metabolism, Synthesis and Transport	3
1.2.3.1 Metabolism of thyroid hormones	3
1.2.3.2 Synthesis of thyroid hormones	3
1.2.3.3 Transport of thyroid hormones	3
1.2.4 Function of thyroid hormones in tissues	6
1.2.5 Thyroid function in pregnant women	8
1.2.5.1 Increase of iodine supply in pregnant women	10
1.2.5.2 Early physiological changes in pregnancy	11
1.2.5.3 Effect of human chorionic gonadotrophin (hCG) on thyroid function.	12
1.2.5.4 Hyperemesis gravidarum	13
1.2.6 Regulation of thyroid function in pregnant women.....	15
1.2.6.1 Regulation of thyroid function in pregnant women with iodine deficiency	16
1.2.7 Total thyroid hormones (T_4 and T_3) levels and relating hormones	19
1.2.7.1 Total thyroxine (T_4) levels	19
1.2.7.2 Total triiodothyronine levels	20
1.2.7.3 Free thyroid hormones (FT_4 and FT_3) levels.....	21
1.2.7.4 Free thyroid hormones indexes	21
1.2.7.5 Thyroxine binding globulin (TBG) levels	22

1.2.7.6	Thyroid stimulating hormone(TSH) levels	24
1.2.7.7	Human chorionic gonadotrophin (β hCG) levels.....	28
1.2.7.8	Thyroglobulin (TG) levels	29
1.2.8	Anti thyroid and thyroid stimulating antibodies	30
1.2.8.1	Anti thyroid antibodies (ATA)	30
1.2.8.2	Thyroid stimulating antibodies (TSA)	31
1.2.9	Evaluation of thyroid function in pregnant patients	32
1.2.10	Thyroid diseases in pregnancy	33
1.2.10.1	Hypothyroidism	33
1.2.10.2	Hyperthyroidism	34
1.2.10.3	Graves' disease (GD)	35
1.2.10.4	Postpartum thyroiditis (PPTD)	35
1.2.11	Management of thyroid disease	36
1.2.11.1	Treatment of hypothyroidism	36
1.2.11.2	Treatment of hyperthyroidism	37
1.2.11.3	Treatment of Graves' disease	38
1.2.11.4	Treatment of postpartum thyroiditis	39
1.2.12	Objectives of the study	40

Chapter two: SUBJECTS, MATERIALS AND METHODS

2.1	Subjects	41
2.1.1	Pregnant subjects	41
2.1.2	Non Pregnant subjects	41
2.2	Materials	41
2.2.1	Material subjects	41
2.2.2	Apparatus and allied materials	42
2.2.3	Specific reagents	42

<u>Subject</u>		<u>Page</u>
2.2.3.1	Radioimmunoassay (RIA) specific reagents	43
2.2.3.2	Immunoradiometric assay (IRMA) specific reagents.....	43
2.3	Methods	45
2.3.1	Measurement of hormones by radioimmunoassay (RIA) techniques ...	45
2.3.1.1	Measurement of total serum thyroxine (T_4)	46
2.3.1.2	Measurement of total serum triiodothyronine (T_3).....	46

2.3.1.3	Measurement of free thyroxine (free T ₄)	47
2.3.1.4	Measurement of free triiodothyronine (free T ₃)	47
2.3.2	Measurement of hormones by immunoradiometricassay techniques	48
2.3.2.1	Measurement of thyroid stimulating hormone (TSH)	48
2.3.2.2	Measurement of thyroglobulin (TG)	49
2.3.2.3	Measurement of human chorionic gonadotrophin (β hCG)	49
2.4	Statistical analysis	51

Chapter three: RESULTS

3.1	Preamble of result	52
3.2	Serum total thyroid hormones (T ₄ and T ₃) concentrations.....	52
3.3	Serum free thyroid hormones (FT ₄ & FT ₃) concentrations.....	53
3.4	Serum thyroid stimulating hormone (TSH) concentrations.....	64
3.5	Serum human chorionic gonadotrophin concentrations.....	64
3.6	Serum thyroglobulin (TG) concentrations	64
3.7	Correlation between hCG and free T ₄ concentrations in first trimester	74
3.8	Correlation between hCG and TSH concentrations in first trimester	74
3.9	Correlation between freeT ₄ and free T ₃ concentrations in first trimester	74

Chapter four: DISCUSSION

4.1	Discussion	79
4.1.1	Serum total thyroid hormones (T ₄ and T ₃) changes in Sudanese pregnant women	79
4.1.2	Serum free thyroid hormone (FT ₄ and FT ₃) changes	80
4.1.3	Thyroid stimulating hormone (TSH) changes	81
4.1.4	Serum human gonadotrophin (hCG) changes	82
4.1.5	Serum thyroglobulin (TG) changes	83

<u>Subject</u>		<u>Page</u>
4.1.6	Correlation between hCG and free T ₄ levels	84
4.1.7	Correlation between hCG and free TSH levels	85
4.1.8	Correlation between free T ₄ and free T ₃ levels	85
4.2	Conclusion	86
4.3	Recommendation	87

LIST OF ABBREVIATION

<u>Abbreviation</u>	<u>Full name</u>
Ab	Antibody
Ag	Antigen
ATA	Anti Thyroid Antibodies
ATG	Anti Thyroglobulin
ATDS	Anti Thyroid Drugs
BMR	Basal Metabolic Rate
FSH	Follicular Stimulating hormone

FTF	Free Thyroxine Fraction
FT₃	Free Triiodothyronine
FT_{3I}	Free Triiodothyronine Index
FT₄	Free Thyroxine
FT_{4I}	Free Thyroxine Index
GD	Grave's Disease
GH	Grave's Hyperthyroidism
hCG	human Chorionic Gonadotrophin
IDD	Iodine Deficiency Disorders
IgA	Immunoglobulin A
IRMA	ImmunoRadioMetric Assay
KD	Kilo Dalton
LH	Lutinizing Hormone
NSB	Non Specific Binding
PPTD	Postpartum Thyroid Disorders
PTU	Propyl Thyouracil
RAIU	Radio Active Iodine Uptake
RIA	RadioImmunoAssay
rT₃	reverse Triiodothyronin
SEM	Standard Error Mean
TBG	Thyroxine Binding Globulin
TBPA	Thyroxine Binding Prealbumin
TBP	Thyroxine binding proteins
TBP-T₄	T ₄ bound to thyroxine binding proteins
TG	Thyroglobulin
TG Ab	Thyroglobulin Antibody
THBR	Thyroid Hormone Binding Ratio
TM Ab	Thyroid microsomal Antibody
TPO	Thyroperoxidase
TRH	Thyroxine releasing hormone
TSA	Thyroid Stimulating Antibodies
TSH	Thyroid Stimulating Hormone
TSI	Thyroid Stimulating Immunoglobulin
TV	Thyroid Volumes

T₃	Triiodothyronine
T₄	Total Thyroxine
U-TBP	Unoccupied T4-binding site on proteins
WHO	World Health Organization
βhCG	Human Chorionic Gonadotropin
