

LIST OF FIGURES

	pag e
Figure 2-1:Local network with range of facilities.	8
Figure 2-2: Local area network (LAN).	11
Figure 2-3: Star topology.	20
Figure 2-4: Bus topology.	24
Figure 2-5: The ring topology.	29
Figure 2-6: The tree topology.	33
Figure 2-7: The mesh topology.	36
Figure 3-1: Unshielded twisted pair wire configuration.	47
Figure 3-2: Shield twisted Pair.	49
Figure 3-3 Coaxial cable.	52
Figure 3-4: Fiber cable components.	54
Figure 3-6: Leased line: dedicated point-to-point connection between sites.	63
Figure 4-1 :A sample network with local and remote bridges.	69
Figure 4-2: Where connecting devices fit into the OSI stack.	71
Figure 4-3: Linking remote campus through router.	80
Figure 4-4: A more complex network.	83
Figure 4-5: Gateways strip off an old protocol stack	85

and add a new protocol stack.

Figure 4-6: Mainframe gateways connect personal computers to mainframe.	87
Figure 5-1: Sites of government computer centers in Gaza and Bank governorates.	90
Figure 5-2: Topology government computer network (Type 1).	93
Figure 5-3: Topology government computer network (Type 2).	94
Figure 5-4: The 1 st phase topology government computer network (Type 2).	96
Figure 5-5: The 2 st phase topology government computer network (Type 2).	97
Figure 5-6: Five hubs connected to switch in GCC Gaza.	101
Figure 5-7: Memory size in GCC Gaza.	102
Figure 5-8: Processor speed in GCC Gaza.	103
Figure 5-9: Hard disk capacity in GCC Gaza.	103
Figure 5-10: Domains and sites for government computer network	112
Figure 5-11: Drive array configuration.	122
Figure 5-12: Government computer center - Khan	130

Younis.
