ACHIEVEMENT OF TOTAL QUALITY MANAGEMENT IN A SUDANESE CONSTRUCTION COMPANY

# BY: MOHAMMED EL BAKRI MOHAMMED (B.tech. Honours, Civil Engineering, S.U.S.T)

A thesis Submitted in partial fulfillment of the requirement for

The degree of Master of Science in Civil Engineering (Construction Management). To Civil Engineering Department.

College of Engineering

December, 2004

In the name of God, most Gracious most Merciful.

Praise be to God, the Cherisher and Sustainer of the world, and his Prayer and Peace be upon Master Mohammed, Along with all his Family and companions in all centuries now and beyond.

### **Dedication**

# To my family

Mohammed

### **Acknowledgment**

I wish to express my thanks to all those who have helped in executing this work.

Dr. Bakri A/Rahim Gafaar; special thanks for guidance, supervision, support and advice.

Dr. Ahmed A/Amin Haroun; special thanks for suggestions and comprehensive feedback.

My appreciation is also due to engineers: Imad Fadl El Margi, Ahmed Omer, for their help and support in providing the data.

Finally , I appreciate the comprehensive feed back and suggestions from my colleagues , who responded and helped make this thesis much better .

### **Abstract**

Due to growing competition and increasing customer expectation, the focus of management moved away from simply managing processes for achieving quality to continuous improvement of processes to ensure the customer expectation would always be met.

The objective of this study is to use TQM techniques in the construction practices in order to obtain higher quality in all field of the company chosen.

Khartoum company for Roads and Bridges is chosen as a case study to implement TQM in Sudan.

The quality in construction industry is the totality of its attributes that enable it to perform a stated task or to fulfill a given need satisfactorily for an acceptable period of time.

Achievement of construction quality is not easy, because there are many participants in the construction process.

The factors affecting the achievement of total quality construction are: quality of the briefing and design process, quality of construction & commissioning process, quality of products and system used, quality of use of building.

We need a quality system to provide support and mechanism for the effective conduct of quality related activities in an organization and construction job sites.

Good is no longer enough. To survive in today's competitive environment, you need to excel.

To excel, an organization needs to focus on all parts of the organization, optimizing the use and effectiveness of all of its resources.

#### الخلاصة

في ظل المنافسة المستمرة ، ونتيجة لتزايد رغبات الزبائن ، تحول اهتمام أالادارة في عالم اليوم من مجرد أدارة العمليات لتحقيق الجودة ، الي التحسين المستمر في العمليات وصولا الي الاداء الامثل والاكمل للتاكد من رضا الزبائن وتحقيق كل توقعاتهم .

هدف هذه الاطروحة هو استخدام تقنيات الجودة الشاملة في ادارة المروحة أعلى في

جميع فروع الشركة المختارة ولُقد اختار البَّاحثُ شركة الخرطوم للطرق والجسور لتطبيق نظام الجودة الشاملة عليها باتباع منهج دراسة الحالة .

ان تُحقيقُ الجُودة في صناعة التشييد ليس بالامر السهل , وذلك نسبة لتعدد المشاركين في عمليات التشييد . العوامل المؤثرة في تحقيق الجودة الشاملة في ادارة التشييد هي جودة التصميم , جودة التنفييذ , جودة المواد المستخدمة , جودة النظام المتبع في ادارة التشييد , جودة الاستخدام للمنشأة . لتحقيق الجودة الشاملة في ادارة التشييد , لابد من النظر الي كل عملية كجزء لا يتجزأ من العمل ككل , ولابد من وضع نظام للجودة يراعي تقديم الدعم والآلية العملية لتحقيق جودة جميع الانشطة في المؤسسة وفي مواقع العمل , وذلك من أجل الوصول الي الاداء الأمثل والأفضل .
