Bill of Quantity (A) Ground Floor

DEMOLITION: N.B

The contractor is required to visit the site and inspect very carefully the existing buildings required for demolition and obtain for himself such additional information as he may deem necessary to accurately price the JOB in this work as to further claims will be admitted on grounds of lack of knowledge.

Item	Description	Unit	Quantity	Unit price	T. Cost
	The following in demolition				
	works of the existing				
	buildings situated in the				
	area hatched in dotted red				
	lines in drawing A-1.				
	1. Demolish all buildings				
	numbered from 1-7 with	Job			
	the following areas:-				
	a. Building Bo. 1	\mathbf{M}^2	140		
	b. Building Bo. 2	\mathbf{M}^2	200		
	c. Building Bo. 3	\mathbf{M}^2	165		
	d. Building Bo. 4	\mathbf{M}^2	85		
	e. Building Bo. 5	\mathbf{M}^2	170		
	f. Building Bo. 6	\mathbf{M}^2	100		
	g. Building Bo. 7	\mathbf{M}^2	360		
	Removal of all trees which				
	are to be found in the area.				
	The buildings to be offices,				
	stores and other building in				
	the area including				
	boundary walls, division				
	walletc.				
	The existing buildings are				
	generally built of:-				
	1. Walls are built in				
	brick works, in lime or				
	P.C mortar and				
	plastered internally.				
	2. Pavior are partly				
	concrete flooring and				
	partly P.C tiles.				
	3. Roofs are partly				
	reinforced concrete and				
	partly corrugated iron				
	roofing with timber				

rafters and purlingect. The arising generally consists of:- a. Roofing materials G.C.I sheeting, timber rafers, purling, morsel tiles ect. b. Doors and windows. c. Undamaged concrete flooring slabs and tiles. d. Bricks out of brick works (suitable for reuse). e. Steel gates. f. Miscellaneous useful articles. It is required that all the above mentioned arising are to be removed from the site of work and kept in closed enclosure far disposed by as directed by the architect. The entire site should be left clear to the entire satisfaction of the Architect. Demolish sanitary line consist of 6 manholes and pipe line about The arising consist of manholes steel covers, undamaged pipeect.	C. 1 14

5. BRICK WORKS

Rates shall include all scaffolding cuttings to from bond, opening holes, chases, quoins,... ect. And all required material and labours.

Rates shall include for externaland internal in fair face bricks (Atabara Type) finished with weather struck jointsrecessed with? "square rods as work proceeds.

Rates shall allow for required opening for air- conditionings, air coolers, ducts.. etc.

Types of bricks must be approves by the Architect before starting work.

Item	Description	Unit	Quantity	Unit price	T. Cost
	Rates shall include all necessary scaffoldings, cuttings to bonds, building to exact length and quion, forming chases, making holesand ducts, and racking out jointsect. Provide and lay good quality redbrick in cement / sand mortar including racking out joint to receive plaster internal and external as stated.				
1	1 ½ brick wall fair faced externally (Sidaba). Atbara Type.	M ²	45		
2	1 brick walls inside building fair faced both sides (Sidaba) Atabara Type.	M ²	120		
	Brick work CARRIED TO SUMMARY				

6. PAVIOR

Rates shall include all straight cutting ,waste and preparing holes. The Architect must approve samples of tiles before delivering to site. Tiles to be installed with slopes where as directed .

N.B Allow for D.P.C layer under tiles bedding.

Item	Description	Unit	Quantity	Unit price	T. Cost
1	Provide and lay in position	\mathbf{M}^2	820		
	20 X 20 cm.brick cement				
	screened and grouted in				
	white cement. The tiles				
	must be cleaned off and				
	smoothed mechanically on				
	completion .				
2	Ditto and ditto but 20 X 20	M.L			
	Terrazzo Tiles for skirting .				
3	Ditto and ditto but 15 X 15	\mathbf{M}^2			
	cm. White glazed tiles.				
	Prvior Carried to Summary				

8. PLUMBERS

Item	Description	Unit	Quantity	Unit price	T. Cost
	The contractor is to execute				
	is the whole of the plumbing				
	works and installation of				
	sanity fittings included				
	under this heading with				
	deatiled drawings and				
	specification clauses.				
	He is to to include in his				
	prices for all work				
	including the builderl's				
	work in connection with the				
	installation to the extend				
	necessary to complete the				
	items in the best workman –				
	like mermer. He is to				
	connect to the nearest				
	manhole as directed by the				
	architect.				
	All fittings trademark to be				
	approved by the architect				
	before being fixed.				
	Rates shall include for				
	sockets, bends, tees,				
	Junction and connectors for				
	joint to fitting.				
	China wetern type WC seat				
	of approved quality.				

Item	Description	Unit	Quantity	Unit price	T. Cost
1	Manhol sizes 60 X 60 cm. Ofof the same invert levels complete with excavations 25cm. Concrete base, R.C. cover one brick thick wall plastered internally, launching and benching around channels and 60 X 60 cm. Cast iron cover and frame.	No.	3		
2	Gully traps sizes 45 X 45 cm.of the same invert levels complete with excavations15cm. Coneret base R.C.and 45 X 45cm. cast iron coverand frame.	No.	3		
3	Provide and fix basin complete set of victory set of chinese type.	No.	6		
4	China ware wash hand basin of approved quality	No.	6		
5	Provide and fix P.V.C 4"pipes vertically	M.L	400		
6	Provide and fix P.V.C 4" pipes horizontally	M.L	270		
7	Provide and fix exhaust fans sizes 20 X 20cm. Plumbers Carried to summary	No.	6		

9. Door Rates include for all labour and materials. Joining, fixing, ...ect. Samples of P.V.c frames and panles and aluminum section and glass shall be submitted the architect for approval.

Item	Description	Unit	Quantity	Unit price	T. Cost
	Rates shall include all				
	necessary labours, jonts,				
	6mm. Thick shadowing				
	glass. Aluminum shall be of				
	approval quality "unless				
	otherwise stated"cut to				
	exact length and size and to				
	conform to drawing details				
	and to any instruction				
	issued by the architect.				
1	Doors				
	Description of door types in				
	compliance is attached				
	drawings.				
2	Type D1glazing aluminum	No.	3		
	doors size 1,.0 x3.00 m				
	comparising one leaf.				
3	Ditto type D2 doors size	No.	3		
	2.00x3.00 m comprising two				
	leaves and insulated glass				
	panel.				
4	Ditto but door type D3 for	No.	6		
	toilets 80 X 250 cm. one leaf				
	with P.V.C panels.				
	Doors carried to summary				

10. GlAzeir

The materials used for glazing works shall be according to samples approved by the Architect and shall be cut to allow about 3mm. All around between the glass panels and the aluminum or P.V.C frames. The thickness of glass sheets shall depend on size of the panels and as may be stated in bills. The design and thickness of glass shall be approved by the architect, as well as luminum and P.V.C sections.

Rates shall include for all labours and materials joining, fixing,..etc. All sizes must be checked on site before manufacutre.

Item	Description	Unit	Quantity	Unit price	T. Cost
	Provide and fix in position				
	glazed panels as stated in				
	the followings :-				
	1. All glass is insulated.				
	2. Allow for windows				
	as direct by the				
	Architect.				
1	Glazed panel on P.V.C	No.	2		
	frames size 1550 X 260 cm.				
	In North and South				
	elevation include 8 windows				
	size 60 X260 cm.				
2	Glazed panels on P.V.C	No.	1		
	frame size 1550 X 260 cm.				
	In West elevations include 4				
	window s size 60 X 260cm.				
	And door size 200 X 290				
	cm.				
3	Glaze panel size 380 X 370	No.	2		
	cm. On aluminum frame in				
	North and South elevation				
	(staircase)				
	Glazier carried to summary				

11. FALSE CEILING

The Architect must approve sample of materials. Rates shall include materials, labour,fixing ...ect.

Item	Description	Unit	Quantity	Unit price	T. Cost
1	Provide all material and fix	\mathbf{M}^2	200		
	in position ceiling of dikin				
	ceiling tiles size 60X 60 cm.				
	As well as fixed for concrete				
	roof.
