

Appendix:

Appendix:

The below figure(1) shows the work that has been done in sharaf-2 using IP software from zone(1) to zone(7).

Throughout the mud logging(cutting samples) integrated with IP analysis, it has been found that Sharaf-2 is only water, there is no oil in there.

The following figure illustrates the lithology, clay volume and porosity evaluation in the sharaf-2 using the same equations and methodology that we used in Sharaf-1.
