Abstract	IV
المستخلص	V
Contents	VI
List of figures	X
List of Tables	XII
Chapter One	
Introduction	
1.1 Historical Background in Mobile Communication	1
1.2 Problem definition.....	1
1.3 Objectives.....	1
1.4 Methodology	2
1.5 Research Layout	2
Chapter Two	
Mobile Communication System	
2.1 Concept of Mobility.....	3
2.2 Mobile Characteristics.....	4
2.2.1 Concept of Mobility.....	4
2.2.2 Internet Accesses Through Broadband	4
2.2.3 Mobile Global Position System (GPS).....	5
2.3 Mobile Frequencies.....	6
2.4 Mobile Architecture.....	7

2.5 Mobile Cellular Systems	8
2.5.1 Cell	9
2.5.2 Types of Cells	9
2.5.3 Clusters.....	9
2.6 Frequency Reuse.....	10
2.7 Type of Channels.....	11
2.7.1 White Gaussian Channel.....	11
2.7.2 Rayleigh Channel.....	12
2.8 Hand Over.....	12
2.9 Rooming.....	13
Chapter Three Mobile Fading	
3.1 Mobile Environment.....	14
3.1.1 Urban Area.....	15
3.1.2 Open Area.....	16
3.1.4 Rural Area.....	17
3.2 Fading Concept.....	17
3.2 Cause of Fading.....	18
3.3 Small Scale Fading.....	19
3.4 Frequency Selective Fading	20
3.5 Fading Effects Due to Doppler Spread	23
3.5.1 Fast Fading.....	23
3.4.2 Slow Fading.....	23
3.5 Large Scale fading	24

Chapter Four	
Diversity Technique	
4.1 Diversity Concept	25
4.2 Types of Diversity.....	25
4.2.1 Frequency Diversity.....	25
4.2.2 Time Diversity.....	26
4.2.3 Space Diversity.....	26
4.2.4 Polarization Diversity	27
4.3 Combining Technique.....	27
4.3.1 Selective Combining.....	27
4.3.2 Equal Gain Combining.....	29
4.3.3 Maximal Ratio Combining (MRC).....	30
Chapter Five	
Equalization	
5.1 An Adaptive Equalizer	32
5.1.1 Channel Equalization.....	33
5.2 Types of Equalizer.....	34
5.2.1 Least Mean Squares Algorithm (LMS).....	34
5.2.2 Recursive Least Square Algorithm (RLS).....	35
5.2.3 CMA Equalizer.....	37
Chapter Six	
Performance Enhancement & Results	
6.1 Descriptive Analyses for Diversity	39
6.2 Mathematical Modeling for Diversity	39
6.3 Computer Modeling & Matlab Code for diversity	40

6.4 Diversity Results	40
6.5 Simulations for Equalization.....	42
6.7 Computer Modeling & Software Simulation for Equalization	42
6.8 Matlab Simulink Diagram.....	43
6.9 Equalizer Results	45
Chapter Seven Observation & Conclusion & Recommendation	
7.1 Observation	49
7.2 Conclusions	49
7.3 Recommendations	49
Abbreviation	50
References	53
Appendix A	54
Appendix B	61

Table of Figures	
Chapter Two	
Mobile Communication System	
2.1 Mobile network connect to PSTN	4
2.2 Simplified architecture of a mobile telecommunication	7
2.3 One cluster with seven cells.....	9
2.4 Frequency reuse	11
Chapter Three	
Mobile Fading	
3.1 Types of Fading	20
3. 2 Frequency Selective Fading Channel Characteristics	22
Chapter Four	
Diversity Technique	
4.1 Generalized Space Diversity Arrangement	26
4.2 Receive Diversity in a Wireless link	27
4.3 Selective Combining	28
4.4 Maximal Ratio Combining	30
Chapter Five	
Equalization	
5.1 Tracking The Channel Characteristics	33
5.2 Transversal Channel Equalizer	34
5. 3 Block Diagram of Adaptive Transversal Filter Employing LMS Algorithm	35
5.4 Block Diagram of Adaptive Transversal Filter Employing RLS Algorithm	36

Chapter Six	
Performance Enhancement & Results	
6.1 Diversity Simulation Flow Chart	39
6.2PER to Eb/No for Diversity and no Diversity and Diversity with (MRC) Combining	42
6.3 Simulink Block Diagram	43
6.4 Constellation	46

Table of Tables	
Chapter Two	
Mobile Communication System	
2.1 Mobile Frequency	6
Chapter Six	
Performance Enhancement & Results	
6.1 PER to Eb/No for no Diversity and Diversity with (MRC)	41
6.2 LMS Equalizer in AWGN Channel	45
6.3 RLS Equalizer In AWGN	47
6.4 CMA Equalizer In AWGN	47
