

List of Figures

Figure 1.1: Limb Loss Statistic.....	2
Figure 1.2: Historical artificial limbs (a).....	4
Figure 1.3: Historical Artificial Limbs (b).....	3
Figure 1.5: Present Artificial Limbs	5
Figure 3.1: index finger joints.....	19
Figure 3.2: actuating fingers	20
Figure 3.3: five fingers of the hand.....	21
Figure 3.4: Prosthetic arm control system block diagram.....	21
Figure 3.5: Hardware and task of the system.....	22
Figure 3.6: PIC16F877A pins layout.....	24
Figure 3.7: SpeakUp voice recognition module.....	27
Figure 3.8: SpeakUp circuit board schematic.....	27
Figure 3.9: DC Servo motor.....	28
Figure 3.10: Servo Motor PWM Timing Diagram.....	30
Figure 3.11: Servo Motor Wiring Diagram.....	30
Figure 3.12: Power Supply Circuit Diagram.....	31
Figure 3.13: system circuit diagram.....	32
Figure 4.1: system operation flowchart.....	35
Figure 4.2: System software design steps.....	36
Figure 4.3: Voice Module initialization flow chart.....	37

Figure 4.4: plug in USB cable and start a new project.....	38
Figure 4.5: Record and save a new voice command.....	39
Figure 4.6: Set the Initial Pin States.....	39
Figure 4.7 Assign output pin actions.....	40
Figure 4.8: Upload the project code.....	41
Figure 4.9: Project simulation on Proteus 8 environment.....	42
Figure 4.10: Writing MikroC code on MikroC pro.....	43
Figure 4.11: Mikroprog programmer.....	43
Figure 5.1: forming the hand.....	46
Figure 5.2: testing the voice commands.....	47
Figure 5.3: running of mikroC code.....	47
Figure 5.4 testing “one” command on proteus.....	49
Figure 5.5: testing “grip” command on proteus.....	50
Figure 5.6: testing “four” command on proteus.....	50
Figure 5.7: testing “ok” command on proteus.....	51
Figure 5.9: System response after command ” four “.....	52
