

الآية

(اللَّهُ نُورُ السَّمَاوَاتِ وَالْأَرْضِ مِثْلُ نُورِهِ كَمِشْكَاةٍ فِيهَا مِصْبَاحٌ الْمِصْبَاحُ فِي زُجَاجَةٍ الزُّجَاجَةُ
كَأَنَّهَا كَوْكَبٌ دُرِّيٌّ يُوقَدُ مِنْ شَجَرَةٍ مُبَارَكَةٍ زَيْتُونَةٍ لَا شَرْقِيَّةٍ وَلَا غَرْبِيَّةٍ يَكَادُ زَيْتُهَا يُضِيءُ وَلَوْ لَمْ
تَمْسَسْهُ نَارٌ نُّورٌ عَلَى نُورٍ يَهْدِي اللَّهُ لِنُورِهِ مَنْ يَشَاءُ وَيَضْرِبُ اللَّهُ الْأَمْثَالَ لِلنَّاسِ وَاللَّهُ بِكُلِّ
شَيْءٍ عَلِيمٌ)

صدق الله العظيم

سورة النور

الآية 35

Dedication

To light that enlightens me the path of success, dear father.

To who taught me and suffered difficulties to make me happy, dear mother.

To those who I walked with them and make my own way towards success,
friends.

Last but not least, my deepest gratitude goes to all the teachers I learnt from
since my childhood, I would not have been here without their guidance, blessing
and support.

Acknowledgment

In the name of Allah, the Most Gracious and the Most Merciful Alhamdulillah, all praises to Allah for endowing me with health, patience and knowledge to complete this work.

I am grateful to who helps me to make this requirement possible and for his valued suggestion. I enjoyed his support and patience during the very tough moment of the research work and writing of the thesis, **Dr.Awadalla Taifor Ali**

Abstract

Water flow control is highly important in industrial applications such as boilers in nuclear power plants. This dissertation analyses the effectiveness of water flow using the Proportional Integral Derivative (PID), fuzzy logic and neuro-fuzzy controllers are implemented in MATLAB/SIMULINK to test the behaviour of the system. The response of the fuzzy controller and neuro fuzzy are compared with a conventional PID controller. The results are shown and the effectiveness of the controllers is illustrated.

مستخلص

التحكم في تدفق الماء مهم جداً في التطبيقات الصناعية مثل المراحل في وحدات القدرة النووية. هذا البحث يحلل تأثير تدفق الماء باستخدام المتحكم التناسبي التكاملي التفاضلي, المنطق الغامض والمنطق الغامض العصبي التي نفذت في برنامج MATLAB/SIMULINK لإختبار سلوك النظام. إستجابه المتحكم الغامض والمتحكم الغامض العصبي حيث تمت مقارنتها بالمتحكم التقليدي التناسبي التكاملي التفاضلي . النتائج تم عرضها وتأثيرات المتحكمات قد وضّحت.
